Background to Architas Multi-Manager Global Funds Unit Trust

Architas Multi-Manager Global Funds Unit Trust (the "Trust") is an umbrella open-ended Unit trust established as an Undertaking for Collective Investment in Transferable Securities ("UCITS") pursuant to the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended), and under the Central Bank of Ireland (the "Central Bank") (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "UCITS Regulations"). The Trust was constituted on 15 February 2011 as an open-ended umbrella structure Unit trust and commenced operations on 18 February 2011.

The Trust is organised in the form of an umbrella fund and comprises several funds (each a "Fund" together the "Funds"). The Trust has obtained the approval of the Central Bank for the establishment of 14 Funds. Additional Funds may be established by the Trust with the prior approval of the Central Bank. The base currency of the Trust is Euro. The base currency of each Fund will be determined by the Manager and is set out in the relevant Supplement to the Prospectus.

The Trust Deed provides that each Fund may have more than one class of Units allocated to it. The Units of each class allocated to a Fund will rank pari passu with each other in all respects except as to all or any of the currency of denomination of the class, and/or the dividend policy of the class, and/or the level of fees and expenses to be charged to the class and/or the minimum subscription, minimum redemption and minimum holding limits applicable to the class, or as the Manager may otherwise determine.

At 30 September 2023, the following classes of Units were funded:

Further classes of Units may be issued on advance notification to, and in accordance with the requirements of the Central Bank.

Background to Architas Multi-Manager Global Funds Unit Trust (cont/d)

AXA Selection Fidelity European Equity terminated on 26 September 2022, but is not de-authorised as at 30 September 2023. Cash and cash equivalents held by the Fund as at 30 September 2023 amounted to €66,243.

The Investment Managers may, in accordance with the requirements of the Central Bank, appoint one or more Sub-Investment Managers to whom it may delegate all or part of the day-to-day conduct of its investment management responsibilities in respect of any Fund. If more than one Sub-Investment Manager is appointed to a Fund, the Investment Manager shall allocate the assets of the Fund between the Sub-Investment Managers in such proportions as it shall, at its discretion, determine.

The investment objectives and policies of each Fund within the umbrella are detailed in the individual Investment Manager's Reports. For a complete description of the objective and policies of each Fund, an investor should read the relevant supplement to the Prospectus.

Global Operating and Geopolitical Environment

The year under review has continued to provide a challenging context, with an environment marked by an ongoing focus on global inflation, interest rates movements, the continued conflict in the Ukraine and disruption in the financial sector through the collapse of certain banks including Silicon Valley Bank and Credit Suisse. Notwithstanding these headwinds, markets rallied over the twelve-month period with inflation rates decelerating towards the end of the period, whilst many central banks continued to tighten monetary policy. The combination of these factors has continued to provide a capricious environment for the majority of asset classes.

The financial statements have been prepared on a going concern basis for the year ended 30 September 2023. The Directors of the Manager are of the view that the Trust can continue in operational existence for twelve months from the date of approval of these financial statements ("the period of assessment"). The Directors of the Manager anticipate the financial assets will continue to generate enough cash flows on an ongoing basis to meet the relevant Fund's liabilities as they fall due. In making this assessment, the Directors of the Manager considered the geopolitical tension in Ukraine, and subsequent events unfolding in Israel and Gaza, the macroeconomic trends (increases in interest rates and persisting high inflation), the stresses in the financial sector and the volatility currently being experienced on financial markets in all asset classes.

Architas Multi-Manager Europe Limited ("AMMEL") continues to closely monitor the risk of disruptions from further pandemic outbreaks and other risks to fund operations. Mitigating plans are in place to protect AMMEL employees, sustain services to fund investors, and other stakeholders and ensure effective processes are in place to communicate and execute such plans.

The Directors of the Manager continue to closely monitor the Funds' potential exposures at a global level, to macroeconomic, geopolitical and business disruption risk, including: (i) the consequences from a deterioration in macroeconomic conditions and a consequential slowdown in the flow of people, goods and services, especially on new business volumes, (ii) change in asset prices and financial conditions (including interest rates), (iii) whether any liquidity management tools are considered required (e.g. ADL's, gating, suspending funds); and (iv) the impact on the services provided to Funds by their service providers.

Minimum Subscription Amount/Minimum Holding

The minimum subscription amount during and after the Initial Offer Period in respect of each Unit class, in each Fund is as follows:

| Unit Class | Minimum Subscription during Initial Offer Period / Minimum Holding | Subsequent Minimum Subscription |
|------------------------------------------------|-----------------------------------------------------------------------|------------------------------------|
| Retail Class R (EUR) Units | €1,000 | €1,000 |
| Institutional Class I (EUR) Units | €1,000,000 | €1,000,000 |
| Institutional Class I (GBP) Units | £1,000,000 | £1,000,000 |
| Institutional Class I (USD) Units | \$1,000,000 | \$1,000,000 |
| Zero Class Z (EUR) Units | €1,000,000 | €1,000,000 |
| Zero Class Z (USD) Units | \$1,000,000 | \$1,000,000 |
| AXA Selectiv' Revenus EUR Distribution R Units | €1,000 | €1,000 |
| Institutional Class I (JPY) Units | ¥100,000,000 | ¥100,000,000 |
| Institutional Class J (JPY) Units | ¥100,000,000 | ¥100,000,000 |

Calculation of Net Asset Value ("NAV")

State Street Fund Services (Ireland) Limited (the "Administrator") shall determine the NAV per Unit of each class of each Fund on each dealing day (i.e. each Business day on the basis set forth below and in accordance with the Trust Deed).

The NAV per Unit of each Fund is determined by dividing the NAV of the relevant class of Units in the relevant Fund by the total number of Units outstanding in the relevant class of Units of the relevant Fund.

Architas Multi-Manager Global Funds Unit Trust

Background to the Trust (cont/d)

Calculation of Net Asset Value ("NAV") (cont/d)

The NAV of each Fund will be equal to all of its assets less all of its liabilities as at the valuation point on each business day plus any interest accrued on underlying assets between the valuation point and the time of calculation of the NAV on the dealing day.

The Manager is responsible for preparing the annual report and the financial statements for each financial period in accordance with applicable Irish Law and Generally Accepted Accounting Practice in Ireland including the accounting standards issued by the Financial Reporting Council and published by the Institute of Chartered Accountants in Ireland.

In preparing these financial statements the Manager is required to:

- Select suitable accounting policies and apply them consistently;
- Make judgements and estimates that are reasonable and prudent; and
- Prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Trust will continue in operation.

The Manager is responsible for keeping proper books of account which disclose with reasonable accuracy at any time the financial position of the Trust and to enable it to ensure that the financial statements are prepared in accordance with accounting standards generally accepted in Ireland and comply with the provisions of the Trust Deed and the UCITS Regulations.

The Manager has delegated responsibility for administration of the Trust's affairs to State Street Fund Services (Ireland) Limited for the purpose of maintaining proper books of account. Accordingly, the books of account are kept at State Street Fund Services (Ireland) Limited, 78 Sir John Rogerson's Quay, Dublin 2, Ireland. State Street Custodial Services (Ireland) Limited ("the Depositary") is responsible for safekeeping of the assets of the Trust in accordance with the Trust Deed.

The Manager is responsible for the maintenance and integrity of the corporate and financial information included on the Investment Manager's website https://select.axa-im.com/. Legislation in the Republic of Ireland governing the preparation and dissemination of the financial statements may differ from legislation in other jurisdictions.

The Manager is also responsible with respect to its duties under the UCITS Regulations to take reasonable steps for the prevention and detection of fraud, and other irregularities.

Dealings with Connected Persons

Regulation 43(1) of the UCITS Regulations "Restrictions of transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length; and b) in the best interest of the Unit-holders of the UCITS".

As required under UCITS Regulation 81.4, the Directors of the Manager, as responsible persons are satisfied that there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected person; and all transactions with connected persons that were entered into during the period to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

On behalf of the Manager

Architas Multi-Manager Global Funds Unit Trust AXA Selection AllianceBernstein Dynamic Diversified

Investment Objective and Policies*

The investment objective of the AXA Selection AllianceBernstein Dynamic Diversified Fund is to seek to maximise total return.

The Fund is designed as a solution for investors who seek long-term growth of capital with moderate volatility by investing in a diversified multi-asset fund which dynamically adjusts investment exposures.

The Fund invests in a globally diversified portfolio of securities and other financial instruments, including financial derivative instruments ("FDIs"), that provide investment exposures to a variety of asset classes. These asset classes will comprise equity securities and fixed income instruments, including high-yield securities, real estate-related securities, currencies and commodity related securities. In normal market conditions the Investment Manager anticipates that a majority of the Fund's exposure will be to equities. The Fund may invest in smaller capitalisation as well as larger capitalisation companies. Save in respect of investment in emerging markets, the Fund is not subject to any limitation on the portion of its net assets that may be invested in any one country or region. The Fund's direct investments will normally be listed or traded on Regulated Markets as set out in Appendix I of the Prospectus.

In pursuit of the investment objective, investments of the Fund will be selected based on the Investment Manager's assessment of market conditions (either positive or negative) at any particular time and with a view to reacting to, and taking advantage of, these market conditions. To achieve the investment objective a proprietary dynamic asset allocation strategy will be used to adjust the Fund's various investment exposures with a view to achieving an optimal risk/return profile at any particular point. The dynamic asset allocation strategy comprises a series of volatility, correlation and expected return forecasting tools that allows short-term fluctuations in risk/return trade-offs across various asset classes to be gauged. The dynamic asset allocation strategy aims to reduce overall portfolio volatility thereby mitigating the effects of short-term market fluctuations without sacrificing consistent long-term return potential. For example, the Fund's risk exposure to one or more asset classes may be reduced when the dynamic asset allocation strategy suggests that market risks relevant to these asset classes are rising but return opportunities are declining. Conversely, a more aggressive posture may be taken where the dynamic asset allocation strategy suggests that return opportunities for one or more of these asset classes are rising and market risks are declining.

The Investment Manager may use Derivatives for efficient portfolio management, hedging or investment purposes in accordance with the Prospectus and the UCITS Regulations.

AXA Selection AllianceBernstein Dynamic Diversified Fund promotes environmental and social characteristics and therefore falls within the scope of Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR") but does not have a sustainable investment objective as such term is understood in accordance with the SFDR.

Further information on the environmental and/or social characteristics, and other SFDR related information of AXA Selection AllianceBernstein Dynamic Diversified Fund is available in the Sustainability Disclosure Annex of the fund supplement and also on the Architas website. (select.axa-im.ie/modal/sustainable-finance-disclosures-review-sfdr-policy/)

AllianceBernstein Limited act as the Sub-Investment Manager to the Fund.

Performance

From 1 October 2022 to 30 September 2023, the 'R' share class of AXA Selection Alliance Bernstein Dynamic Diversified returned 1.59% (net of fees) in Euro terms.**

Market Review

Fears of a severe global recession proved unfounded, helped by a resilient U.S. economy and China's surprise zero-COVID pivot at the end of 2022. Headline inflation rates declined sharply over the 12 months under review, but core inflation proved far stickier. While the U.S. Federal Reserve and the European Central Bank hiked rates steeply, the pace of rate increases moderated as the period progressed. By the end of September 2023, U.S. and eurozone policymakers indicated that rates were at/near their peaks but dashed hopes of substantial cuts in 2024, indicating that interest rates would need to stay higher for longer to bring inflation back to target.

The Bank of Japan remained the outlier, sticking to its ultra-accommodative stance. The People's Bank of China also cut rates as China's economic rebound from the ending of all pandemic restrictions faded. Central banks in some other emerging markets, such as Brazil. also started to cut rates.

Equity Markets

Global equities rebounded over the period as fears of a global recession faded (MSCI World Index +13.40% in EUR), although the rally ran out of steam in the third quarter of 2023 as investors started to realise that hopes of rate cuts were premature.

Architas Multi-Manager Global Funds Unit Trust AXA Selection AllianceBernstein Dynamic Diversified

Equity Markets (cont/d)

U.S. equities led returns with the S&P 500 Index surging 21.60% in USD terms as growth stocks recovered sharply, helped in part by growing interest in artificial intelligence and its applications. European stocks also delivered robust gains (MSCI Europe Index +20.00% EUR) amid relief that the eurozone had managed to avoid a deep recession as it learned to live without Russian oil and gas. Japanese shares gained 17.00% in EUR terms (MSCI Japan Index), boosted by strong foreign demand due in part to corporate governance reforms. However, Chinese equities lagged, with the MSCI China Index dropping 2.40% in EUR terms as China's economic recovery ran out of steam in 2023.

Bond Markets

Global bonds were mixed over the 12 months, with the Bloomberg Global Aggregate Bond Index returning 2.20% in USD terms. Government bonds sold off as yields rose sharply, but corporate bonds delivered positive returns, led by high-yield debt.

In the U.S., the 10-year Treasury closed the period near its highest level since July 2007 as markets started to price in that interest rates would stay higher for longer. The Bloomberg U.S. Government Index lost (0.70)% over the 12 months. In contrast, U.S. high-yield bonds returned 10.20% (ICE BoA U.S. High Yield Index USD) as their higher coupons helped to protect them from the sharp rise in Treasury yields.

It was a similar story in Europe, where the 10-year German Bund closed September 2023 around a 12-year high. While the Bloomberg Euro Government Bond Index fell 2.00% in EUR terms, corporate bond returns were positive. Again, high-yield bonds rallied the most, with the ICE BoA Euro High Yield Index rising 11.10% in EUR terms.

Currency Markets

It was a mixed period for the US Dollar, with losses for the first three quarters partly offset by a stronger end to the reporting period. Overall, the US Dollar Index, which measures the dollar's performance against a basket of its major trading partners, declined 5.30% over the 12 months.

The euro appreciated against the dollar. While U.S. headline inflation fell swiftly, inflation fell more slowly in the eurozone, causing investors to back a continued hawkish stance from the European Central Bank. In contrast, the Japanese yen depreciated against the dollar. While the U.S. Federal Reserve raised rates to a 22-year high of 5.25-5.50%, the Bank of Japan (BoJ) maintained borrowing costs at (0.10)%. However, the BoJ did tweak its yield curve control policy to allow longer term Japanese government bond yields to rise.

Emerging Market Debt

Emerging market bonds rallied sharply, mirroring the surge in other riskier areas of the bond markets, such as high-yield debt. While central banks in most developed markets continued to raise rates as they attempted to bring inflation back to target, central banks in many emerging markets reached the end of their rate-hiking cycles – and some started to reduce rates as the review period drew to a close. Brazil, for example, cut rates by 100 basis points in the summer of 2023 as inflation fell. The People's Bank of China also reduced borrowing costs in an attempt to stimulate flagging economic growth.

Hard-currency bonds, which are issued in currencies such as the US Dollar or euro, returned 10.00% in USD terms (JPMorgan EMBI Global Diversified Index), while local-currency bonds also rallied, gaining 13.10% in USD terms (JPMorgan GBI-EM Global Diversified Index).

Architas Multi-Manager Global Funds Unit Trust AXA Selection AllianceBernstein Dynamic Diversified

Fund Review

The Fund produced a positive return for the 12-month period ending 30 September 2023. The Fund is composed of a mix of equities and fixed Income instruments with global exposure. Global equity markets rebounded after a poor end to 2022 as fears of global recession receded in 2023. The first quarter of 2023 saw both equities and fixed income bounce back despite rising concerns in the global banking sector. Inflation dominated headlines for the period leading to multiple interest rate hikes. The overweight in equities and allocation towards growth-oriented stocks contributed to performance as growth-oriented stocks led gains for the period.

^{*}Please refer to the Prospectus and relevant Supplements for a full version of the investment objective and policies.

^{**}Source: Morningstar.

Architas Multi-Manager Global Funds Unit Trust AXA Selection Flexible

Investment Objective and Policies*

The investment objective of the AXA Selection Flexible Fund is to seek medium-term capital growth.

The Fund invests in interest-rate, convertible and equity securities. The Fund may invest up to 10% of its assets in UCITS and acceptable Non-UCITS. The Fund may also invest in FDIs.

In order to achieve its investment objective, the Fund invests in interest-rate or convertible bond products (i.e. fixed income securities which can, at the option of the purchaser be converted into equity or equity-related securities), equities and UCITS in the light of market trends. The Manager will allocate between asset classes by applying a value-based opportunistic approach to seek an optimal risk/reward profile.

The Fund may therefore invest in and/or be exposed to:

- from 0 100% of the Fund's NAV in interest-rate or convertible bond products which may be government or corporate bonds of fixed or floating rate, across all maturities which are rated or unrated and which are listed or traded on Regulated Markets. High-yield investments will be limited to 20% of the Fund's NAV;
- from 0 100% of the Fund's NAV in mid or large-cap equities;
- from 0 20% of the Fund's NAV in small cap equity securities;
- from 0 10% of the Fund's NAV in UCITS which help the Fund to achieve its own investment objective and strategies;
- short term liquid assets such as money market instruments, as defined in the Notices and which include UCITS and acceptable Non-UCITS money market investment funds;
- The Fund may invest up to 20% of its NAV in emerging economies.

The Fund may also use exchange-traded or over-the counter ("OTC") FDI traded on Regulated Markets; interest-rate and index swaps (to gain exposure to the asset classes listed above); forward currency contracts, forward foreign currency swaps (to gain exposure to the global interest rate and credit markets, to obtain a fixed return or spread, to increase capital gains or to hedge or alter exposure to a security in the asset classes listed above which is not readily accessible); and equity, interest-rate, currency and index futures and options (to gain efficient exposure to the investments outlined above, to reduce risk, to increase returns and for hedging purposes) in accordance with provisions of the Prospectus and the limitations set down in Appendix II to the Prospectus.

AXA Selection Flexible Fund promotes environmental and social characteristics and therefore falls within the scope of Article 8 of the SFDR but does not have a sustainable investment objective as such term is understood in accordance with the SFDR.

Further information on the environmental and/or social characteristics, and other SFDR related information of AXA Selection Flexible Fund is available in the Sustainability Disclosure Annex of the fund supplement and also on the Architas website. (select.axa-im.ie/modal/sustainable-finance-disclosures-review-sfdr-policy/)

Rothschild Investment Services act as the Sub-Investment Manager to the Fund.

Performance

From 1 October 2022 to 30 September 2023, the 'R' share class of AXA Selection Flexible returned 14.22% (net of fees) in Euro terms.**

Market Review

Fears of a severe global recession proved unfounded, helped by a resilient U.S. economy and China's surprise zero-COVID pivot at the end of 2022. Headline inflation rates declined sharply over the 12 months under review, but core inflation proved far stickier. While the U.S. Federal Reserve and the European Central Bank hiked rates steeply, the pace of rate increases moderated as the period progressed. By the end of September 2023, U.S. and eurozone policymakers indicated that rates were at/near their peaks but dashed hopes of substantial cuts in 2024, indicating that interest rates would need to stay higher for longer to bring inflation back to target.

The Bank of Japan remained the outlier, sticking to its ultra-accommodative stance. The People's Bank of China also cut rates as China's economic rebound from the ending of all pandemic restrictions faded. Central banks in some other emerging markets, such as Brazil, also started to cut rates.

While central banks in most developed markets continued to raise rates as they attempted to bring inflation back to target, central banks in many emerging markets reached the end of their rate-hiking cycles - and some started to reduce rates as the review period drew to a close. Brazil, for example, cut rates by 100 basis points in the summer of 2023 as inflation fell. The People's Bank of China also reduced borrowing costs in an attempt to stimulate flagging economic growth.

Hard-currency bonds, which are issued in currencies such as the US Dollar or euro, returned 10.00% in USD terms (JPMorgan EMBI Global Diversified Index), while local-currency bonds also rallied, gaining 13.10% in USD terms (JPMorgan GBI-EM Global Diversified Index).

Architas Multi-Manager Global Funds Unit Trust AXA Selection Flexible

Fund Review

The Fund produced a positive return for the 12-month period ending 30 September 2023. The Fund is composed of a mix of equities and fixed income instruments with global exposure. Global equity markets rebounded after a poor end to 2022 as fears of global recession receded in 2023. The first quarter of 2023 saw both equities and fixed income bounce back despite rising concerns in the global banking sector. Inflation dominated headlines for the period leading to multiple interest rate hikes. The overweight in equities and allocation towards growth-oriented stocks contributed to performance as growth-oriented stocks led gains for the period.

Architas Multi-Manager Global Funds Unit Trust AXA Selection Strategic Balanced

Investment Objective and Policies*

AXA Selection Strategic Balanced Fund seeks to maximise total return from income and capital growth.

In order to achieve its objective, the Fund will invest in eligible Investment Funds or make direct investments. The eligible Investment Funds in which the Fund will invest will have a balanced range of underlying investments which may reflect either direct investment in, or exposure to, fixed-income securities equities and/or equity-related securities, money market instruments, commodities, real estate, derivatives, financial indices and/or currencies. Some of the eligible Investment Funds may be leveraged from time to time. The Fund is not subject to any limitation on the portion of its assets that may be exposed, through investment in eligible Investment Funds, to any one country, region or sector or asset class. The eligible Investment Funds in which the Fund will invest in will be selected using qualitative and quantitative risk assessments that are determined by the Investment Manager.

The Fund's portfolio may be entirely invested in Units or shares in eligible Investment Funds and may also invest in other Funds of the Trust in accordance with the conditions of Appendix III to the Prospectus.

In addition to the investments in the above via eligible Investment Funds, the Fund may also invest up to 20% of its NAV directly in fixed-income securities, which may be government or corporate bonds of fixed or floating rate, across all maturities which are rated investment grade or below investment grade (by a recognised agency) or unrated and which are listed or traded on Regulated Markets, equities (such as common or preferred stocks), short term liquid assets such as money market instruments, as defined in the UCITS Notices and which include UCITS and acceptable non-UCITS money market investment funds and unlisted securities in accordance with the UCITS requirements.

The Fund may enter into securities lending, repurchase and/or reverse repurchase agreements solely for the purposes of efficient portfolio management and subject to the conditions and limits set out in the UCITS Notices.

AXA Selection Strategic Balanced Fund promotes environmental and social characteristics and therefore falls within the scope of Article 8 of the SFDR but does not have a sustainable investment objective as such term is understood in accordance with the SFDR.

Further information on the environmental and/or social characteristics, and other SFDR related information of AXA Selection Strategic Balanced Fund is available in the Sustainability Disclosure Annex of the fund supplement and also on the Architas website. (select.axa-im.ie/modal/sustainable-finance-disclosures-review-sfdr-policy/)

Performance

From 1 October 2022 to 30 September 2023, the 'R' share class of AXA Selection Strategic Balanced returned 7.11% (net of fees) in Euro terms.**

Market Review

Fears of a severe global recession proved unfounded, helped by a resilient U.S. economy and China's surprise zero-COVID pivot at the end of 2022. Headline inflation rates declined sharply over the 12 months under review, but core inflation proved far stickier. While the U.S. Federal Reserve and the European Central Bank hiked rates steeply, the pace of rate increases moderated as the period progressed. By the end of September 2023, U.S. and eurozone policymakers indicated that rates were at/near their peaks but dashed hopes of substantial cuts in 2024, indicating that interest rates would need to stay higher for longer to bring inflation back to target.

The Bank of Japan remained the outlier, sticking to its ultra-accommodative stance. The People's Bank of China also cut rates as China's economic rebound from the ending of all pandemic restrictions faded. Central banks in some other emerging markets, such as Brazil, also started to cut rates.

Equity Markets

Global equities rebounded over the period as fears of a global recession faded (MSCI World Index +13.40% in EUR), although the rally ran out of steam in the third quarter of 2023 as investors started to realise that hopes of rate cuts were premature.

U.S. equities led returns with the S&P 500 Index surging 21.60% in USD terms as growth stocks recovered sharply, helped in part by growing interest in artificial intelligence and its applications. European stocks also delivered robust gains (MSCI Europe Index +20.00% EUR) amid relief that the eurozone had managed to avoid a deep recession as it learned to live without Russian oil and gas. Japanese shares gained 17.00% in EUR terms (MSCI Japan Index), boosted by strong foreign demand due in part to corporate governance reforms. However, Chinese equities lagged, with the MSCI China Index dropping 2.40% in EUR terms as China's economic recovery ran out of steam in 2023.

Bond Markets

Global bonds were mixed over the 12 months, with the Bloomberg Global Aggregate Bond Index returning 2.20% in USD terms. Government bonds sold off as yields rose sharply, but corporate bonds delivered positive returns, led by high-yield debt.

Architas Multi-Manager Global Funds Unit Trust AXA Selection Strategic Balanced

Bond Markets (cont/d)

In the U.S., the 10-year Treasury closed the period near its highest level since July 2007 as markets started to price in that interest rates would stay higher for longer. The Bloomberg U.S. Government Index lost (0.70)% over the 12 months. In contrast, U.S. highyield bonds returned 10.20% (ICE BoA U.S. High Yield Index USD) as their higher coupons helped to protect them from the sharp rise in Treasury yields.

It was a similar story in Europe, where the 10-year German Bund closed September 2023 around a 12-year high. While the Bloomberg Euro Government Bond Index fell 2.00% in EUR terms, corporate bond returns were positive. Again, high-yield bonds rallied the most, with the ICE BoA Euro High Yield Index rising 11.10% in EUR terms.

Currency Markets

It was a mixed period for the US Dollar, with losses for the first three quarters partly offset by a stronger end to the reporting period. Overall, the US Dollar Index, which measures the dollar's performance against a basket of its major trading partners, declined 5.30% over the 12 months.

The euro appreciated against the dollar. While U.S. headline inflation fell swiftly, inflation fell more slowly in the eurozone, causing investors to back a continued hawkish stance from the European Central Bank. In contrast, the Japanese yen depreciated against the dollar. While the U.S. Federal Reserve raised rates to a 22-year high of 5.25-5.50%, the Bank of Japan (BoJ) maintained borrowing costs at (0.10)%. However, the BoJ did tweak its yield curve control policy to allow longer term Japanese government bond yields to rise.

Emerging Market Debt

Emerging market bonds rallied sharply, mirroring the surge in other riskier areas of the bond markets, such as high-yield debt. While central banks in most developed markets continued to raise rates as they attempted to bring inflation back to target, central banks in many emerging markets reached the end of their rate-hiking cycles – and some started to reduce rates as the review period drew to a close. Brazil, for example, cut rates by 100 basis points in the summer of 2023 as inflation fell. The People's Bank of China also reduced borrowing costs in an attempt to stimulate flagging economic growth.

Hard-currency bonds, which are issued in currencies such as the US Dollar or euro, returned 10.00% in USD terms (JPMorgan EMBI Global Diversified Index), while local-currency bonds also rallied, gaining 13.10% in USD terms (JPMorgan GBI-EM Global Diversified Index).

Fund Review

The Fund produced a positive return for the 12-month period ending 30 September 2023. The Fund is composed of a mix of equities and fixed income instruments with global exposure. The global equity markets rebounded over the period after a poor end to 2022 as fears of a global recession receded in 2023. The first quarter of 2023 saw both equities and fixed income bounce back despite rising concerns in the global banking sector. Inflation dominated headlines for the period leading to multiple interest rate hikes. All asset classes within the Fund benefitted from the resurgence, recovering gains from 2022. The best performing Fund over the period was R-co Valor benefitting from its exposure to growth-oriented mega cap stocks.

Architas Multi-Manager Global Funds Unit Trust AXA Selection Carmignac Convictions

Investment Objective and Policies*

The investment objective of the AXA Selection Carmignac Convictions Fund is to seek medium-term capital growth.

The Fund is a fund of funds, holding a minimum of 50% of its NAV in eligible Investment Funds.

In order to achieve its investment objective, the Fund may have the following direct investments and/or exposures through the use of FDIs or investment in eligible Investment Funds:

- from 0 100% of the Funds' NAV in interest-rate, inflation-linked or convertible bond products (such as fixed income securities which can, at the option of the purchaser be converted into equity or equity-related securities (such as ADRs or GDRs)) which may be government or corporate bonds of fixed or floating rate, across all maturities which are rated or unrated and which are listed or traded on Regulated Markets;
- from 0 100% of the Funds' NAV in small, mid or large-cap equities or in equity-related securities;
- from 0 20% of the Funds' NAV in commodities through the use of FDI on commodity indices cleared by the Central Bank and investing in eligible Investment Funds. The Fund may also seek commodity-related exposures through investment in equities of commodity producers or other commodity-related issuers;
- from 0 100% of the Funds' NAV in short term liquid assets such as money market instruments, as defined in the Notices and which include money market eligible Investment Funds;
- from 0 100% of the Funds' NAV in currencies of any denomination;
- from 0 100% of the Funds' NAV in emerging markets. The Sub-Investment Manager, in its discretion, will determine what constitutes "emerging markets". The Sub-Investment Manager's determination of what constitutes emerging markets may change from time to time;
- Subject to the EU Sanctions regime requirements and the definition of a transferable security under the UCITS regulations, the Fund may invest up to 100% of its NAV in securities listed or traded in Russia. The Fund had no exposure to Russian listed or traded securities over the period and sanctions controls are currently in place to avoid direct investments in Russia.

Save for permitted Investments in unlisted securities, Investments of the Fund will generally be listed or traded on Regulated Markets. The Fund may also use exchange-traded or OTC FDI traded on Regulated Markets such as interest-rate and index swaps (to gain exposure to the asset classes listed above); securities with embedded derivatives (such as warrants, credit linked notes, Euro Medium Term Notes and subscription certifications); forward foreign currency contracts or swaps (to gain exposure to currencies or to hedge interest rate or currency exposure); and equity, dividend, interest-rate, currency and index futures and options (to gain efficient exposure to the investments outlined above, to reduce risk, to increase returns and for hedging purposes) in accordance with provisions of the Prospectus and the limitations set down in Appendix II to the Prospectus. With this in mind, it hedges its portfolio and/or exposure to economic sectors, geographical areas, currencies, interest rates, equities, securities and indexes, where appropriate.

The Fund may enter into securities lending, repurchase and/or reverse repurchase agreements for the purposes of efficient portfolio management and subject to the conditions and limits set out in the UCITS Notices.

The Sub-Investment Manager will have in place a risk management process ("RMP") cleared by the Central Bank which allows it to accurately measure, monitor and manage the associated risks. Any FDI not included in the RMP will not be utilised until such time as a revised submission has been provided to the Central Bank. The Sub-Investment Manager uses a risk management technique known as absolute value-at-risk to assess the Fund's market risk to seek to ensure that the use of FDI by the Fund is within regulatory limits. The one-tailed 99% confidence level, one month (20 Business Days) holding period, value-at-risk on the portfolio of the Fund shall be calculated on at least a daily basis and shall not exceed 20% of its NAV in any one day. The value-at-risk model will use one year of historical data of daily market moves. Using the value-at-risk approach for exposure measurement does not necessarily limit leverage levels. However, the Fund through its investments in FDI will be leveraged. Calculating leverage resulting from derivative usage, in accordance with the requirements of the Central Bank, as the sum of notionals underlying all the FDI positions in the Fund expressed as a percentage of its NAV the expected level of the Fund's leverage will be 200% of its NAV. Higher leverage levels are possible, but leverage will not exceed 500% of the Fund's NAV at any

AXA Selection Carmignac Convictions Fund promotes environmental and social characteristics and therefore falls within the scope of Article 8 of the SFDR but does not have a sustainable investment objective as such term is understood in accordance with the SFDR.

Architas Multi-Manager Global Funds Unit Trust AXA Selection Income

Investment Objective and Policies*

The investment objective of the AXA Selection Income Fund is to seek to provide an attractive level of income relative to prevailing interest rates while aiming to maintain or grow capital over the medium to longer term.

In order to achieve its objective, the Fund will invest in eligible Investment Funds and make direct investments. The eligible Investment Funds in which the Fund will invest will have a range of underlying investments which may reflect either direct investment in, or exposure to, fixed-income securities, equities and/or equity-related securities, money market instruments, commodities, real estate, derivatives, financial indices and/or currencies. Some of the eligible Investment Funds may be leveraged from time to time. The Fund is not subject to any limitation on the portion of its assets that may be exposed, through investment in eligible Investment Funds, to any one country, region or sector or asset class and may invest in eligible Investment Funds which invest in or have exposure to emerging markets. The eligible Investment Funds in which the Fund will invest will be selected using qualitative and quantitative risk assessments that are determined by the Investment Manager or any subinvestment manager appointed by the Investment Manager. AXA Selection Income may invest up to 100% of its NAV in eligible Investment Funds and may also invest in other Funds of the Trust in accordance with the conditions of Appendix III to the Prospectus.

The Fund may also invest directly in equities (such as common or preferred stocks), Units or shares of Real Estate Investment Trusts ("REITS") and equity related-securities (such as American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs"). The Fund may also invest in fixed-income securities, which may be government or corporate bonds of fixed or floating rate, across all maturities which are rated investment grade or below investment grade (by a recognised agency) or unrated and which are listed or traded on Regulated Markets, short term liquid assets such as money market instruments, as defined in the UCITS Notices and which include UCITS and acceptable non-UCITS money market investment funds and unlisted securities in accordance with the UCITS requirements.

The Fund may gain exposure to assets through direct investments or investment in eligible Investment Funds. Investment in eligible Investment Funds as opposed to direct investments may be made for reasons of diversification, efficiency or to gain access to particular investment managers or asset classes. AXA Selection Income may be more than 20% exposed to emerging markets through either direct investment or investment in eligible Investment Funds.

AXA Selection Income Fund promotes environmental and social characteristics and therefore falls within the scope of Article 8 of the SFDR but does not have a sustainable investment objective as such term is understood in accordance with the SFDR.

Further information on the environmental and/or social characteristics, and other SFDR related information of AXA Selection Income Fund is available in the Sustainability Disclosure Annex of the fund supplement and also on the Architas website. (select.axa-im.ie/modal/sustainable-finance-disclosures-review-sfdr-policy/)

Performance

Fund Review

The Fund produced a positive return for the 12-month period ending 30 September 2023. The Fund is composed of a mix of equities and fixed income instruments with global exposure. Global equity markets rebounded after a poor end to 2022 as fears of a global recession receded in 2023. The first quarter of 2023 saw both equities and fixed income bounce back despite rising concerns in the global banking sector. Inflation dominated headlines for the period leading to constant interest rate hikes. Most asset classes within the Fund benefitted from the resurgence in the equity and bond market. The worst performing Fund over the period was AXA Global Generation.

Architas Multi-Manager Global Funds Unit Trust Architas Selection Bonds Core

Investment Objective and Policies*

The Architas Selection Bonds Core Fund seeks to maximise total return from income and capital growth mainly through investing indirectly or directly in fixed-income securities.

The Fund will seek to gain exposure to a wide variety of fixed-income securities. The fixed-income securities to which the Fund may gain exposure can be denominated in any currency. The Investment Manager will utilise its extensive research and market insight to seek out opportunities for outperformance through asset allocation decisions as determined by the Investment Manager in its discretion.

The Investment Manager will carry out qualitative risk assessments when constructing the Fund's portfolio by selecting complimentary investments that strike the best balance in its view between risk and potential return. Research tools may be used by the Investment Manager to analyse the historic volatility and correlation of returns of potential investments and to examine how overall portfolio risk may vary as weightings change.

In addition, the Investment Manager will carry out quantitative screening assessments utilising a proprietary approach designed to provide it with an understanding of how investment performance was achieved and to highlight consistency in delivering returns. This process will assist the Investment Manager to filter the available universe of potential investments in constructing the portfolio.

The Fund is not subject to any limitation on the portion of its assets that may be exposed, through investment, to any one country, region or sector or asset class; but it is expected to be mainly (greater than 50%) exposed to fixed income securities, whether through direct investment or through indirect exposure, with a bias to corporate and/or government debt.

In order to achieve its objective, the Fund will invest in eligible Investment Funds or make direct investments. The eligible Investment Funds in which the Fund will invest will have underlying investments which may reflect either direct investment in, or exposure to, fixed-income securities, equities and/or equity-related securities, money market instruments, commodities, real estate, derivatives, financial indices and/or currencies.

Some of the eligible Investment Funds may be leveraged from time to time. The eligible Investment Funds in which the Fund will invest in will be selected using qualitative and quantitative risk assessments that are determined by the Investment Manager. The Fund's portfolio may be entirely invested in Units or shares in eligible Investment Funds and may also invest in other Funds of the Trust in accordance with the conditions of Appendix III to the Prospectus.

The Fund may also invest up to 30% of its NAV directly in fixed-income securities, which may be government or corporate bonds of fixed or floating rate, across all maturities which are rated investment grade or below investment grade (by a recognised agency) or unrated and which are listed or traded on Regulated Markets, short term liquid assets such as money market instruments, as defined in accordance with the Central Bank Requirements and which include UCITS and acceptable alternative investment funds money market collective investment schemes and unlisted securities in accordance with the UCITS requirements.

The Fund may also enter into securities lending, repurchase and/or reverse repurchase agreements solely for the purposes of efficient portfolio management in accordance with the provisions of the UCITS Regulations.

Architas Selection Bonds Core Fund promotes environmental and social characteristics and therefore falls within the scope of Article 8 of the SFDR but does not have a sustainable investment objective as such term is understood in accordance with the SFDR.

Further information on the environmental and/or social characteristics, and other SFDR related information of Architas Selection Bonds Core Fund is available in the Sustainability Disclosure Annex of the fund supplement and also on the Architas website. (select.axa-im.ie/modal/sustainable-finance-disclosures-review-sfdr-policy/)

Performance

From 1 October 2022 to 30 September 2023, the 'l' share class of Architas Selection Bonds Core returned (0.86)% (net of fees) in Euro terms.**

Market Review

Fears of a severe global recession proved unfounded, helped by a resilient U.S. economy and China's surprise zero-COVID pivot at the end of 2022. Headline inflation rates declined sharply over the 12 months under review, but core inflation proved far stickier. While the U.S. Federal Reserve and the European Central Bank hiked rates steeply, the pace of rate increases moderated as the period progressed. By the end of September 2023, U.S. and eurozone policymakers indicated that rates were at/near their peaks but dashed hopes of substantial cuts in 2024, indicating that interest rates would need to stay higher for longer to bring inflation back to target.

Architas Multi-Manager Global Funds Unit Trust Architas Selection Bonds Core

Market Review (cont/d)

The Bank of Japan remained the outlier, sticking to its ultra-accommodative stance. The People's Bank of China also cut rates as China's economic rebound from the ending of all pandemic restrictions faded. Central banks in some other emerging markets, such as Brazil, also started to cut rates.

Bond Markets

Global bonds were mixed over the 12 months, with the Bloomberg Global Aggregate Bond Index returning 2.20% in USD terms. Government bonds sold off as yields rose sharply, but corporate bonds delivered positive returns, led by high-yield debt.

In the U.S., the 10-year Treasury closed the period near its highest level since July 2007 as markets started to price in that interest rates would stay higher for longer. The Bloomberg U.S. Government Index lost (0.70)% over the 12 months. In contrast, U.S. highyield bonds returned 10.20% (ICE BoA U.S. High Yield Index USD) as their higher coupons helped to protect them from the sharp rise in Treasury yields.

It was a similar story in Europe, where the 10-year German Bund closed September 2023 around a 12-year high. While the Bloomberg Euro Government Bond Index fell 2.00% in EUR terms, corporate bond returns were positive. Again, high-yield bonds rallied the most, with the ICE BoA Euro High Yield Index rising 11.10% in EUR terms.

Currency Markets

It was a mixed period for the US Dollar, with losses for the first three quarters partly offset by a stronger end to the reporting period. Overall, the US Dollar Index, which measures the dollar's performance against a basket of its major trading partners, declined 5.30% over the 12 months.

The euro appreciated against the dollar. While U.S. headline inflation fell swiftly, inflation fell more slowly in the eurozone, causing investors to back a continued hawkish stance from the European Central Bank. In contrast, the Japanese yen depreciated against the dollar. While the U.S. Federal Reserve raised rates to a 22-year high of 5.25-5.50%, the Bank of Japan (BoJ) maintained borrowing costs at (0.10)%. However, the BoJ did tweak its yield curve control policy to allow longer term Japanese government bond yields to rise.

Emerging Market Debt

Emerging market bonds rallied sharply, mirroring the surge in other riskier areas of the bond markets, such as high-yield debt. While central banks in most developed markets continued to raise rates as they attempted to bring inflation back to target, central banks in many emerging markets reached the end of their rate-hiking cycles - and some started to reduce rates as the review period drew to a close. Brazil, for example, cut rates by 100 basis points in the summer of 2023 as inflation fell. The People's Bank of China also reduced borrowing costs in an attempt to stimulate flagging economic growth.

Hard-currency bonds, which are issued in currencies such as the US Dollar or euro, returned 10.00% in USD terms (JPMorgan EMBI Global Diversified Index), while local-currency bonds also rallied, gaining 13.10% in USD terms (JPMorgan GBI-EM Global Diversified Index).

Fund Review

The Fund produced a negative return for the 12-month period ending 30 September 2023. The Fund is composed of a broad mix of government and corporate fixed income instruments which were negatively impacted by rising interest rates as various central banks around the world combated inflation. Asset allocation was a positive contributor to returns. The Fund benefitted from being overweight european corporate bonds as it outperformed its regional peers. Robeco Financial Institutional Bonds was the strongest performer during the period as it outperformed its benchmark. Allianz Strategic Bond was the leading detractor to performance for the period as it was greatly impacted by the rising interest rate environment.

Architas Multi-Manager Global Funds Unit Trust Architas Selection Bonds Satellite

Currency Markets

It was a mixed period for the US Dollar, with losses for the first three guarters partly offset by a stronger end to the reporting period. Overall, the US Dollar Index, which measures the dollar's performance against a basket of its major trading partners, declined 5.30% over the 12 months.

The euro appreciated against the dollar. While U.S. headline inflation fell swiftly, inflation fell more slowly in the eurozone, causing investors to back a continued hawkish stance from the European Central Bank. In contrast, the Japanese yen depreciated against the dollar. While the U.S. Federal Reserve raised rates to a 22-year high of 5.25-5.50%, the Bank of Japan (BoJ) maintained borrowing costs at (0.10)%. However, the BoJ did tweak its yield curve control policy to allow longer term Japanese government bond yields to rise.

Emerging Market Debt

Emerging market bonds rallied sharply, mirroring the surge in other riskier areas of the bond markets, such as high-yield debt. While central banks in most developed markets continued to raise rates as they attempted to bring inflation back to target, central banks in many emerging markets reached the end of their rate-hiking cycles - and some started to reduce rates as the review period drew to a close. Brazil, for example, cut rates by 100 basis points in the summer of 2023 as inflation fell. The People's Bank of China also reduced borrowing costs in an attempt to stimulate flagging economic growth.

Hard-currency bonds, which are issued in currencies such as the US Dollar or euro, returned 10.00% in USD terms (JPMorgan EMBI Global Diversified Index), while local-currency bonds also rallied, gaining 13.10% in USD terms (JPMorgan GBI-EM Global Diversified Index).

Convertible bonds

Convertible bonds rallied over the 12 months under review, with the ICE BoA Global 300 Convertibles Bond Index gaining 8.80% in USD terms. This compared to a return of 22.00% for global equities (MSCI World Index USD) and 2.20% for global bonds (Bloomberg Global Aggregate Bond Index USD). While convertible bond returns lay between those of global equities and global bonds, as is to be expected, they underperformed other riskier areas of the bond market, such as high-yield debt which rallied 13.40% (Bloomberg Global High Yield Index USD). Issuance levels have been strong over the year, with periods of rising interest rates typically associated with greater issuance of convertible bonds.

Fund Review

The Fund produced a positive return for the 12-month period ending 30 September 2023. The Fund is composed of the riskier spectrum of fixed income instruments, containing emerging market debt, high yield bonds and convertible bonds. All asset classes bounced back in 2023 after a challenging end to 2022 in the credit and equity market respectively. Emerging market and high yield bonds generated positive returns for the period despite rising interest rate environment which pushed bonds prices lower. Convertible bonds also posted positive returns with the resurgence in global equity markets. Manager selection was a positive contributor to returns, notably in the emerging market debt space where all the managers outperformed their benchmarks. Neuberger Berman EM Debt Hard Currency led gains for the period. AXA WF Global Convertible was the leading detractor to performance.

The Fund's portfolio may be entirely invested in Units or shares in eligible Investment Funds and may also invest in other Funds of the Trust in accordance with the conditions of Appendix III to the Prospectus.

In addition to the investments in the above via eligible Investment Funds, the Fund may also invest up to 30% of its NAV directly in equities (such as common or preferred stocks), short term liquid assets such as money market instruments, as defined in accordance with the Central Bank Requirements and which include UCITS and acceptable alternative investment funds money market collective investment schemes and unlisted securities in accordance with the UCITS requirements.

The Fund may also enter into securities lending, repurchase and/or reverse repurchase agreements solely for the purposes of efficient portfolio management in accordance with the provisions of the UCITS Regulations.

Architas Selection Equity Fund promotes environmental and social characteristics and therefore falls within the scope of Article 8 of the SFDR but does not have a sustainable investment objective as such term is understood in accordance with the SFDR.

Further information on the environmental and/or social characteristics, and other SFDR related information of Architas Selection Equity Fund is available in the Sustainability Disclosure Annex of the fund supplement and also on the Architas website. (select.axa-im.ie/modal/sustainable-finance-disclosures-review-sfdr-policy/)

Performance

From 1 October 2022 to 30 September 2023, the 'I' share class of Architas Selection Equity returned 10.24% (net of fees) in Euro terms.**

Market Review

Fears of a severe global recession proved unfounded, helped by a resilient U.S. economy and China's surprise zero-COVID pivot at the end of 2022. Headline inflation rates declined sharply over the 12 months under review, but core inflation proved far stickier. While the U.S. Federal Reserve and the European Central Bank hiked rates steeply, the pace of rate increases moderated as the period progressed. By the end of September 2023, U.S. and eurozone policymakers indicated that rates were at/near their peaks but dashed hopes of substantial cuts in 2024, indicating that interest rates would need to stay higher for longer to bring inflation back to target.

The Bank of Japan remained the outlier, sticking to its ultra-accommodative stance. The People's Bank of China also cut rates as China's economic rebound from the ending of all pandemic restrictions faded. Central banks in some other emerging markets, such as Brazil. also started to cut rates.

Architas Multi-Manager Global Funds Unit Trust Architas Selection Equity

Equity Markets

Global equities rebounded over the period as fears of a global recession faded (MSCI World Index +13.40% in EUR), although the rally ran out of steam in the third quarter of 2023 as investors started to realise that hopes of rate cuts were premature.

U.S. equities led returns with the S&P 500 Index surging 21.60% in USD terms as growth stocks recovered sharply, helped in part by growing interest in artificial intelligence and its applications. European stocks also delivered robust gains (MSCI Europe Index +20.00% EUR) amid relief that the eurozone had managed to avoid a deep recession as it learned to live without Russian oil and gas. Japanese shares gained 17.00% in EUR terms (MSCI Japan Index), boosted by strong foreign demand due in part to corporate governance reforms. However, Chinese equities lagged, with the MSCI China Index dropping 2.40% in EUR terms as China's economic recovery ran out of steam in 2023.

Currency Markets

It was a mixed period for the US Dollar, with losses for the first three quarters partly offset by a stronger end to the reporting period. Overall, the US Dollar Index, which measures the dollar's performance against a basket of its major trading partners, declined 5.30% over the 12 months.

The euro appreciated against the dollar. While U.S. headline inflation fell swiftly, inflation fell more slowly in the eurozone, causing investors to back a continued hawkish stance from the European Central Bank. In contrast, the Japanese yen depreciated against the dollar. While the U.S. Federal Reserve raised rates to a 22-year high of 5.25-5.50%, the Bank of Japan (BoJ) maintained borrowing costs at (0.10)%. However, the BoJ did tweak its yield curve control policy to allow longer term Japanese government bond yields to rise.

Fund Review

The Fund produced a positive return for the 12-month period ending 30 September 2023. The Fund is composed of both developed and emerging market equities both of which experienced strong positive returns during the period. The end of 2022 was a notably challenging period for equity market performance. Global equity markets rebounded in 2023 as fears of a global recession subsided. Manager selection and asset allocation were both negative for the period as AXA WF Europe Opportunities detracted the most from performance. Selection European Equity was the strongest performing Fund.

Architas Multi-Manager Global Funds Unit Trust Architas World Ex-Japan Passive Bond

Investment Objective and Policies*

Architas World ex-Japan Passive Bond Fund seeks to provide investors with a total return, taking into account both capital and income returns, which reflects, before fees and expenses, the return of the Index.

Architas World ex-Japan Passive Bond Fund operates as an index tracker fund. The Index measures the movement in the secondary market of global ex-Japan fixed income securities that meet certain criteria. Architas World ex-Japan Passive Bond Fund will, insofar as possible and practicable, replicate the risk and return profile of the Index in a cost-efficient way by minimising the portfolio's ex-ante tracking error through an optimised sampling approach, subject to a number of factors. Factors considered in the investment process will include consideration of the investment restrictions described in Appendix III to the Prospectus. A full list of factors that may be considered is also set out in Schedule II of this Supplement.

The Fund will invest in fixed or floating rate fixed-income securities across all maturities which are rated investment grade or below investment grade (by a recognised agency) or unrated and which are listed or traded on Regulated Markets. Architas World ex-Japan Passive Bond Fund will not invest more than 30% of its net assets in below investment grade fixed income securities. The government bonds in which Architas World ex-Japan Passive Bond Fund may invest may include government bonds issued by sovereign or other governmental or municipal entities, including governmental agencies. Architas World ex-Japan Passive Bond Fund may invest in securities of any country or currency included in the Index.

In the event that Architas World ex-Japan Passive Bond Fund receives securities of countries or currencies not included in the Index, Architas World ex-Japan Passive Bond Fund may continue to hold the investment until such time as it is possible and practicable (in the Manager's view) to liquidate the position, taking consideration of factors including the costs and potential impact on performance.

Architas World ex-Japan Passive Bond Fund may also invest in other collective investment schemes (including exchange traded funds ("ETFs") and other Funds of the Trust) pursuing similar policies to Architas World ex-Japan Passive Bond Fund to gain exposure to constituents of the Index or the Index itself. The Fund may invest no more than 10% of its net assets in collective investment schemes, including ETFs which are UCITS or which comply in all material respects with the Central Bank UCITS Regulations and Appendix III of the Prospectus.

In pursuit of its investment objective, Architas World ex-Japan Passive Bond Fund may employ FDI for investment purposes or efficient portfolio management purposes in accordance with the provisions of the Prospectus and the limitations set down in Appendix II of the Prospectus. Investments in FDI may include, but are not limited to, futures (which may be used to for duration matching or to manage large cash flows). The Fund will only utilise FDI which are included in a RMP submitted to the Central Bank.

In relation to Total Return Swaps ("TRS"), the Manager expects that such transactions will apply to 0% of the NAV of Architas World ex-Japan Passive Bond Fund, however the Fund may enter into such transactions up to 100% of its NAV.

Architas World ex-Japan Passive Bond Fund may enter into securities lending, repurchase and/or reverse repurchase agreements solely for the purposes of efficient portfolio management in accordance with the provisions of the Central Bank Requirements and Appendix II to the Prospectus. The Manager expects that lending of securities and repurchase and/or reverse repurchase transactions will apply to 0% of the NAV of Architas World ex-Japan Passive Bond Fund, however, the Fund may enter into such transactions up to 100% of its NAV.

Global exposure of Architas World ex-Japan Passive Bond Fund will be measured and monitored using the commitment approach. The Fund may be leveraged up to 100% of its NAV as a result of its use of FDI. In accordance with the borrowing restrictions set out in Appendix III of the Prospectus, Architas World ex-Japan Passive Bond Fund may also borrow up to 10% of its NAV temporarily.

DWS Group act as the Sub-Investment Manager to the Fund.

From 1 October 2022 to 30 September 2023, the 'J' share class of World Ex-Japan Passive Bond returned 4.77% (net of fees) in JPY terms, compared to a return of 5.26% in JPY terms for the fund's benchmark (FTSE Non-JPY World Government Bond).**

Market Review

Fears of a severe global recession proved unfounded, helped by a resilient U.S. economy and China's surprise zero-COVID pivot at the end of 2022. Headline inflation rates declined sharply over the 12 months under review, but core inflation proved far stickier. While the U.S. Federal Reserve and the European Central Bank hiked rates steeply, the pace of rate increases moderated as the period progressed. By the end of September 2023, U.S. and eurozone policymakers indicated that rates were at/near their peaks but dashed hopes of substantial cuts in 2024, indicating that interest rates would need to stay higher for longer to bring inflation back to target.

Architas Multi-Manager Global Funds Unit Trust Architas World Ex-Japan Passive Bond

Market Review (cont/d)

The Bank of Japan remained the outlier, sticking to its ultra-accommodative stance. The People's Bank of China also cut rates as China's economic rebound from the ending of all pandemic restrictions faded. Central banks in some other emerging markets, such as Brazil, also started to cut rates.

Bond Markets

Global bonds were mixed over the 12 months, with the Bloomberg Global Aggregate Bond Index returning 2.20% in USD terms. Government bonds sold off as yields rose sharply, but corporate bonds delivered positive returns, led by high-yield debt.

In the U.S., the 10-year Treasury closed the period near its highest level since July 2007 as markets started to price in that interest rates would stay higher for longer. The Bloomberg U.S. Government Index lost (0.70)% over the 12 months. In contrast, U.S. highyield bonds returned 10.20% (ICE BoA U.S. High Yield Index USD) as their higher coupons helped to protect them from the sharp rise in Treasury yields.

It was a similar story in Europe, where the 10-year German Bund closed September 2023 around a 12-year high. It was a mixed period for the US Dollar, with losses for the first three quarters partly offset by a stronger end to the reporting period. Overall, the US Dollar Index, which measures the dollar's performance against a basket of its major trading partners, declined 5.30% over the 12 months.

The euro appreciated against the dollar. While U.S. headline inflation fell swiftly, inflation fell more slowly in the eurozone, causing investors to back a continued hawkish stance from the European Central Bank. In contrast, the Japanese yen depreciated against the dollar. While the U.S. Federal Reserve raised rates to a 22-year high of 5.25-5.50%, the Bank of Japan (BoJ) maintained borrowing costs at (0.10)%. However, the BoJ did tweak its yield curve control policy to allow longer term Japanese government bond yields to rise.

Emerging Market Debt

Emerging market bonds rallied sharply, mirroring the surge in other riskier areas of the bond markets, such as high-yield debt. While central banks in most developed markets continued to raise rates as they attempted to bring inflation back to target, central banks in many emerging markets reached the end of their rate-hiking cycles – and some started to reduce rates as the review period drew to a close. Brazil, for example, cut rates by 100 basis points in the summer of 2023 as inflation fell. The People's Bank of China also reduced borrowing costs in an attempt to stimulate flagging economic growth.

Hard-currency bonds, which are issued in currencies such as the US Dollar or euro, returned 10.00% in USD terms (JPMorgan EMBI Global Diversified Index), while local-currency bonds also rallied, gaining 13.10% in USD terms (JPMorgan GBI-EM Global Diversified Index).

Convertible bonds

Convertible bonds rallied over the 12 months under review, with the ICE BoA Global 300 Convertibles Bond Index gaining 8.80% in USD terms. This compared to a return of 22.00% for global equities (MSCI World Index USD) and 2.20% for global bonds (Bloomberg Global Aggregate Bond Index USD). While convertible bond returns lay between those of global equities and global bonds, as is to be expected, they underperformed other riskier areas of the bond market, such as high-yield debt which rallied 13.40% (Bloomberg Global High Yield Index USD). Issuance levels have been strong over the year, with periods of rising interest rates typically associated with greater issuance of convertible bonds.

Architas Multi-Manager Global Funds Unit Trust Architas World Ex-Japan Passive Bond

Fund Review

The Fund produced a positive return however underperformed against its benchmark for the 12-month period ending 30 September 2023. The Fund tracks a broad index providing exposure to the global sovereign fixed income markets. The index measures the performance of fixed-rate local currency investment-grade sovereign bonds. It comprises sovereign debt from over 20 countries, denominated in a variety of currencies. The Fund was positive for the period as global bond markets bounced back after a challenging 2022.

Architas Multi-Manager Global Funds Unit Trust Architas Global Equity

Investment Objective and Policies*

The investment objective of the Architas Global Equity Fund is to provide investors with long-term capital growth.

The Fund is actively managed. In order to achieve its objective, the Fund will invest in a diversified and actively managed portfolio of equities by investing in eligible Investment Funds and/or make direct investments (as described below).

The eligible Investment Funds in which the Fund will invest directly in, or gain exposure to, will provide the Fund with exposure to equities and equity-related securities, including large cap equities, medium cap equities, small cap equities, common stocks, preferred stocks, warrants, ADRs and GDRs. The eligible Investment Funds in which the Fund may invest may also have exposure to fixed-income securities (such as corporate and government bonds), cash and cash equivalents (such as certificates of deposit) and derivatives (such as futures). Some of the eligible Investment Funds may be leveraged from time to time. The Fund is not subject to any limitation on the portion of its assets that may be exposed, through investment in eligible Investment Funds, to any one country, region or sector or asset class.

The Manager will utilise its extensive research (including investment due diligence and analysis, examining both qualitative and quantitative assessments described below) and market insight to seek out opportunities for outperformance through security selection and asset allocation decisions as determined by the Manager in its discretion.

The Manager will carry out qualitative assessments (considering factors such as the investment returns and risks related to the execution of the strategy) when constructing the Fund portfolio by selecting complimentary investments that strike the best balance in its view between risk and potential return. Research tools (such as fund databases and fund analysis tools) may be used by the Manager to analyse the historic volatility and correlation of returns of potential investments and to examine how overall portfolio risk may vary as weightings change.

In addition, the Manager will carry out data-driven quantitative screening assessments (using factors such as risk adjusted returns and assessing the resilience of the investment in adverse market conditions) on the basis of an approach that is proprietary to the Manager designed to provide it with an understanding of how investment performance was achieved and to highlight consistency in delivering returns. This process will assist the Manager to filter the available universe of potential investments in constructing the portfolio.

The Fund may invest up to 100% of its NAV in eligible Investment Funds and may also invest in other Funds of the Trust in accordance with the conditions of Appendix III to the Prospectus.

In addition to the investments in eligible Investment Funds, the Fund may also invest directly in equities (such as common or preferred stocks), equity related-securities (such as ADRs and GDRs) and cash and cash equivalents such as deposits, certificates of deposit, bills of exchange and other short term liquid assets such as money market instruments, as defined in the Central Bank's UCITS Regulations, and which include UCITS and acceptable non-UCITS money market collective investment schemes and unlisted securities in accordance with the Central Bank Requirements. The Fund is not subject to any limitation on the portion of its assets that may be exposed, through direct investment, to any one country, region or sector.

While it is not currently intended that the Fund will engage in FDI, in pursuit of its investment objective, the Fund may, in the future, employ FDI for investment purposes or efficient portfolio management purposes in accordance with the provisions of the Prospectus and the limitations set down in Appendix II to the Prospectus. If the Fund intends to invest in FDI in the future, the Supplement will be updated accordingly. Investments in FDI may include but are not limited to equity index futures (which will be used to gain efficient exposure to equities or equity-related securities). The Fund will only utilise FDI which are included in a RMP submitted to the Central Bank. Please refer to the section headed "Investment in FDI and Efficient Portfolio Management" in the Prospectus for further information regarding FDI which may be used by the Fund and information regarding their use.

In relation to TRS, the Manager expects that such transactions will apply to 0% of the NAV of the Fund, however the Fund may enter into such transactions up to 100% of its NAV.

The Fund may enter into securities lending, repurchase and/or reverse repurchase agreements solely for the purposes of efficient portfolio management in accordance with the provisions of the Central Bank Requirements and Appendix II to the Prospectus. The Manager expects that lending of securities and repurchase transactions will apply to 0% of the NAV of the Fund, however, the Fund may enter into such transactions up to 100% of its NAV. The Manager expects that borrowing of securities and reverse repurchase transactions will apply to 0% of the NAV of the Fund, however, the Fund may enter into such transactions up to 100% of its NAV. Details on the past utilisation of these transactions are contained in the Fund annual report.

Global exposure of the Fund will be measured and monitored using the commitment approach. The Fund may be leveraged up to 100% of its NAV if FDI is utilized by the Fund. The Fund may also borrow up to 10% of its NAV temporarily.

Architas Global Equity Fund promotes environmental and social characteristics and therefore falls within the scope of Article 8 of the SFDR but does not have a sustainable investment objective as such term is understood in accordance with the SFDR.

Investment Objective and Policies* (cont/d)

Further information on the environmental and/or social characteristics, and other SFDR related information of Architas Global Equity Fund is available in the Sustainability Disclosure Annex of the fund supplement and also on the Architas website. (select.axa-im.ie/modal/sustainable-finance-disclosures-review-sfdr-policy/)

Wellington Management International Limited act as the Sub-Investment Manager to the Fund.

Performance

From 1 October 2022 to 30 September 2023, the 'I' share class of Architas Global Equity Fund returned 23.98% (net of fees) in JPY terms, compared to a return of 25.73% in JPY terms for the fund's benchmark (MSCI World Net Return).**

Market Review

Fears of a severe global recession proved unfounded, helped by a resilient U.S. economy and China's surprise zero-COVID pivot at the end of 2022. Headline inflation rates declined sharply over the 12 months under review, but core inflation proved far stickier. While the U.S. Federal Reserve and the European Central Bank hiked rates steeply, the pace of rate increases moderated as the period progressed. By the end of September 2023, U.S. and eurozone policymakers indicated that rates were at/near their peaks but dashed hopes of substantial cuts in 2024, indicating that interest rates would need to stay higher for longer to bring inflation back to target.

The Bank of Japan remained the outlier, sticking to its ultra-accommodative stance. The People's Bank of China also cut rates as China's economic rebound from the ending of all pandemic restrictions faded. Central banks in some other emerging markets, such as Brazil, also started to cut rates.

Equity Markets

Global equities rebounded over the period as fears of a global recession faded (MSCI World Index +13.40% in EUR), although the rally ran out of steam in the third quarter of 2023 as investors started to realise that hopes of rate cuts were premature.

U.S. equities led returns with the S&P 500 Index surging 21.60% in USD terms as growth stocks recovered sharply, helped in part by growing interest in artificial intelligence and its applications. European stocks also delivered robust gains (MSCI Europe Index +20.00% EUR) amid relief that the eurozone had managed to avoid a deep recession as it learned to live without Russian oil and gas. Japanese shares gained 17.00% in EUR terms (MSCI Japan Index), boosted by strong foreign demand due in part to corporate governance reforms. However, Chinese equities lagged, with the MSCI China Index dropping 2.40% in EUR terms as China's economic recovery ran out of steam in 2023.

Currency Markets

It was a mixed period for the US Dollar, with losses for the first three guarters partly offset by a stronger end to the reporting period. Overall, the US Dollar Index, which measures the dollar's performance against a basket of its major trading partners, declined 5.30% over the 12 months.

The euro appreciated against the dollar. While U.S. headline inflation fell swiftly, inflation fell more slowly in the eurozone, causing investors to back a continued hawkish stance from the European Central Bank. In contrast, the Japanese ven depreciated against the dollar. While the U.S. Federal Reserve raised rates to a 22-year high of 5.25-5.50%, the Bank of Japan (BoJ) maintained borrowing costs at (0.10)%. However, the BoJ did tweak its yield curve control policy to allow longer term Japanese government bond yields to rise.

Architas Multi-Manager Global Funds Unit Trust Architas Global Equity

Fund Review

The Fund produced a positive return however underperformed against its benchmark for the 12-month period ending 30 September 2023. The Fund is composed of equities with global exposure. The Fund's preference towards U.S. equities contributed to performance over the period as U.S. equity markets bounced back after a challenging end to 2022. The Fund's strong preference towards growth-oriented stocks greatly helped drive performance as growth-oriented stocks led gains for the period. However the Fund gave up some of its gains for the period as U.S. equity markets were driven by the top mega cap technology stocks.

Architas Multi-Manager Global Funds Unit Trust AXA Capital Global Equity

Investment Objective and Policies*

The investment objective of AXA Capital Global Equity is to provide investors with long-term capital growth from a diversified and actively managed portfolio of securities.

The Investment Manager seeks to invest in companies that stand to gain from changing patterns of global trade. Such companies are often at the forefront of creating, driving and shaping multi-generational secular shifts in the global economy. In pursuing its primary investment objective. AXA Capital Global Equity uses fundamental bottom-up research to construct a portfolio on a company-by-company basis, with a focus on individual companies — not countries or regions, using in-depth global research to find companies with sound management teams and sustainable competitive advantages. The strategy invests in a spectrum of early stage and established multinational companies that can provide structural growth and resilience. Multinationals represent a powerful subset of the global equity universe as they have key advantages, such as flexibility and adaptability, that can make for enduring long-term investments in a constantly changing world.

AXA Capital Global Equity is actively managed. AXA Capital Global Equity will aim to achieve its objective by investing at least two thirds of its NAV in equities domiciled, listed, quoted or traded on Regulated Markets globally. AXA Capital Global Equity may also invest up to 30% in equity-related securities (including preferred stock ADRs and GDRs). AXA Capital Global Equity is not subject to any limitation on the portion of its NAV that may be invested in any one country, region or sector. AXA Capital Global Equity may invest up to 10% of its NAV in UCITS and acceptable alternative investment funds (as referred to at 1.5 of Appendix III of the Prospectus). Subject to the EU Sanctions regime requirements and the definition of a transferable security under the UCITS regulations, the AXA Capital Global Equity Fund may invest up to 5% of its NAV in securities listed or traded in Russia. The Fund has exposure to 3 Russian based equity positions (Gazprom PJSC, LUKOIL PJSC and Rosneft PJSC) which are being monitored by the AMMEL Pricing Committee. Sanctions controls are currently in place to avoid further direct investments in Russia.

AXA Capital Global Equity may invest in fixed income securities if, in the opinion of the Investment Manager, such investment would improve the performance of AXA Capital Global Equity. While it is not anticipated that AXA Capital Global Equity will invest a significant proportion of its NAV in fixed income securities (investment in fixed income securities will, at all times be less than 10% of the NAV of AXA Capital Global Equity), AXA Capital Global Equity may, from time to time, invest in fixed and/or floating rate debt securities and in fixed income related securities, such as Global Depositary Notes. Such securities may include investment grade and/or high yield (rated by a recognised agency) debt securities. Such Investments will be unleveraged.

In pursuit of its investment objective AXA Capital Global Equity may employ FDI for investment purposes or efficient portfolio management purposes in accordance with the provisions of the Prospectus and the limitations set down in Appendix II to the Prospectus. Investments in FDI may include forward currency exchange contracts (which will be used to hedge currency exposure of underlying securities). AXA Capital Global Equity will only utilise FDI which are included in a RMP submitted to the Central Bank. Please refer to the section headed "Investment in FDI and Efficient Portfolio Management" in the Prospectus for further information regarding the use of FDI.

In relation to TRS, the Manager expects that such transactions will apply to 0% of the NAV of AXA Capital Global Equity, however AXA Capital Global Equity may enter into such transactions up to 100% of its NAV.

AXA Capital Global Equity will not invest in structured notes (instruments which enable a fund to gain an economic exposure to an equity security, a combination of equity securities or an index, whilst having a primary credit risk to the issuer of the note). AXA Capital Global Equity may enter into securities lending, repurchase and/or reverse repurchase agreements solely for the purposes of efficient portfolio management in accordance with the provisions of the Central Bank Requirements and Appendix II to the Prospectus. The Manager expects that lending of securities and repurchase transactions will apply to 0% of the NAV of AXA Capital Global Equity, however, AXA Capital Global Equity may enter into such transactions up to 100% of its NAV. The Manager expects that borrowing of securities and reverse repurchase transactions will apply to 0% of the NAV of AXA Capital Global Equity however AXA Capital Global Equity may enter into such transactions up to 100% of its NAV. Details on the past utilisation of these transactions are contained in the AXA Capital Global Equity annual report.

Global exposure of AXA Capital Global Equity will be measured and monitored using the commitment approach. AXA Capital Global Equity may be leveraged up to 100% of its NAV as a result of its use of FDI. AXA Capital Global Equity may also borrow up to 10% of its NAV temporarily.

Capital Group act as the Sub-Investment Manager to the Fund.

Performance

From 28 October 2022 to 30 September 2023, the 'l' share class of AXA Capital Global Equity Fund returned 24.42% (net of fees) in JPY terms, compared to a return of 24.54% in JPY terms for the fund's benchmark (MSCI ACWI NR).**

However, Chinese equities lagged, with the MSCI China Index dropping 2.40% in EUR terms as China's economic recovery ran out of steam in 2023.

Fund Review

The Fund produced a positive return however underperformed against its benchmark for the 12-month period ending 30 September 2023. The Fund is composed of predominately growth orientated global equities. The broader global equity market bounced back after a challenging end to 2022. The Fund benefitted from its tilt to more cyclical growth-oriented stocks as growth stocks led gains in major equity markets. The Fund's exposure to growth orientated equities helped drive performance despite rate hikes by central banks to combat inflation.

Architas Multi-Manager Global Funds Unit Trust Selection European Equity

Equity Markets (cont/d)

U.S. equities led returns with the S&P 500 Index surging 21.60% in USD terms as growth stocks recovered sharply, helped in part by growing interest in artificial intelligence and its applications. European stocks also delivered robust gains (MSCI Europe Index +20.00% EUR) amid relief that the eurozone had managed to avoid a deep recession as it learned to live without Russian oil and gas. Japanese shares gained 17,00% in EUR terms (MSCI Japan Index), boosted by strong foreign demand due in part to corporate governance reforms. However, Chinese equities lagged, with the MSCI China Index dropping 2.40% in EUR terms as China's economic recovery ran out of steam in 2023.

Fund Review

The Fund produced a positive return however underperformed against its benchmark for the 12-month period ending 30 September 2023. The largest position in the portfolio over the period continues to be the core holding (Goldman Sachs) which outperformed the broad index and its peer group as fears of a deep recession receded in the eurozone. The growth focused Comgest strategy rebounded after a challenging 2022 despite the early fears banking crisis in Q1 2023 and rising interest rate environment. Despite the positive performance of Comgest, it underperformed it style peer group and index. The satellite position, a value ETF benefitted over the period as value-oriented stocks led gains for the period in the eurozone. It also outperformed its style index and peer group contributing slightly to overall performance given its smaller weight.

Market Review

Fears of a severe global recession proved unfounded, helped by a resilient U.S. economy and China's surprise zero-COVID pivot at the end of 2022. Headline inflation rates declined sharply over the 12 months under review, but core inflation proved far stickier. While the U.S. Federal Reserve and the European Central Bank hiked rates steeply, the pace of rate increases moderated as the period progressed. By the end of September 2023, U.S. and eurozone policymakers indicated that rates were at/near their peaks but dashed hopes of substantial cuts in 2024, indicating that interest rates would need to stay higher for longer to bring inflation back to target.

The Bank of Japan remained the outlier, sticking to its ultra-accommodative stance. The People's Bank of China also cut rates as China's economic rebound from the ending of all pandemic restrictions faded. Central banks in some other emerging markets, such as Brazil, also started to cut rates.

Equity Markets

Global equities rebounded over the period as fears of a global recession faded (MSCI World Index +13.40% in EUR), although the rally ran out of steam in the third quarter of 2023 as investors started to realise that hopes of rate cuts were premature.

Architas Multi-Manager Global Funds Unit Trust Selection US Equity

Equity Markets (cont/d)

U.S. equities led returns with the S&P 500 Index surging 21.60% in USD terms as growth stocks recovered sharply, helped in part by growing interest in artificial intelligence and its applications. European stocks also delivered robust gains (MSCI Europe Index +20.00% EUR) amid relief that the eurozone had managed to avoid a deep recession as it learned to live without Russian oil and gas. Japanese shares gained 17,00% in EUR terms (MSCI Japan Index), boosted by strong foreign demand due in part to corporate governance reforms. However, Chinese equities lagged, with the MSCI China Index dropping 2.40% in EUR terms as China's economic recovery ran out of steam in 2023.

Fund Review

The Fund produced a positive return however underperformed against its benchmark for the 12-month period ending 30 September 2023. The Fund is composed of 3 U.S. equity mandates, all of which benefitted from the resurgence of the U.S. stock market after a challenging end to 2022. Performance was driven by portfolio construction while manager selection was negative for the year. Performance was driven by AB, the growth mandate manger which strongly outperformed over the period. Jacobs Levy and JP Morgan the core and value manager respectively lagged behind their benchmark. The positive contribution from portfolio construction was driven by a bias toward value stocks which outperformed over the period.

Architas Multi-Manager Europe Limited 6 November 2023

^{**}Source: Morningstar.

Architas Multi-Manager Global Funds Unit Trust Selection Japan Equity

Investment Objective and Policies*

The investment objective of Selection Japan Equity is to provide investors with long-term capital growth from a diversified and actively managed portfolio of securities.

Selection Japan Equity is subject to the overall management of the Manager who in turn appoints one or more Investment Managers and determines the allocation given to each such Investment Manager. Each Investment Manager will be responsible for the selection of investments on behalf of the Selection Japan Equity based on its particular investment style. For example, certain selected Investment Managers may adopt a growth style whereby they will seek to identify companies they believe will generate superior long-term earnings, whereas other selected Investment Managers may adopt a value style whereby they seek to identify companies that are undervalued by the market and are trading at a discount to their intrinsic value. Each Investment Manager will be subject to the Investment Objective and Investment Policy of the Selection Japan Equity. The Manager is not limited as to the investment style of each Investment Manager that it may select. The Manager may, itself, also manage all or a specified allocation of the Selection Japan Equity.

Selection Japan Equity will aim to achieve its objective by investing at least two-thirds of its NAV in equities domiciled, listed, quoted or traded on Regulated Markets in Japan. Selection Japan Equity may also invest up to 30% in equity-related securities (including preferred stock ADRs and GDRs) and companies (which may be small, medium or large capitalisation companies) established outside of Japan. Selection Japan Equity is not subject to any limitation on the portion of its NAV that may be invested in any one sector. Selection Japan Equity may invest up to 10% of its NAV in UCITS and acceptable alternative investment funds (as referred to at 1.5 of Appendix III of the Prospectus).

In pursuit of its investment objective Selection Japan Equity may employ FDI for investment purposes or efficient portfolio management purposes in accordance with the provisions of the Prospectus and the limitations set down in Appendix II to the Prospectus. Investments in FDI may include, but are not limited to equity index futures (which will be used to gain efficient exposure to equities or equity-related securities). Selection Japan Equity will only utilise FDI which are included in a RMP submitted to the Central Bank.

In relation to TRS, the Manager expects that such transactions will apply to 0% of the NAV of Selection Japan Equity, however Selection Japan Equity may enter into such transactions up to 100% of its NAV.

Selection Japan Equity may enter into securities lending, repurchase and/or reverse repurchase agreements solely for the purposes of efficient portfolio management in accordance with the provisions of the Central Bank Requirements and Appendix II to the Prospectus. The Manager expects that lending of securities and repurchase transactions will apply to 0% of the NAV of Selection Japan Equity, however, Selection Japan Equity may enter into such transactions up to 100% of its NAV. The Manager expects that borrowing of securities and reverse repurchase transactions will apply to 0% of the NAV of Selection Japan Equity however Selection Japan Equity may enter into such transactions up to 100% of its NAV. Details on the past utilisation of these transactions are contained in the Selection Japan Equity annual report.

Global exposure of Selection Japan Equity will be measured and monitored using the commitment approach. Selection Japan Equity may be leveraged up to 100% of its NAV as a result of its use of FDI. Selection Japan Equity may also borrow up to 10% of its NAV temporarily.

Selection Japan Equity Fund promotes environmental and social characteristics and therefore falls within the scope of Article 8 of the SFDR but does not have a sustainable investment objective as such term is understood in accordance with the SFDR.

Further information on the environmental and/or social characteristics, and other SFDR related information of Selection Japan Equity Fund is available in the Sustainability Disclosure Annex of the fund supplement and also on the Architas website. (select.axa-im.ie/modal/sustainable-finance-disclosures-review-sfdr-policy/)

Nikko Asset Management Europe Ltd., Jupiter Asset Management Limited and Comgest Asset Management International Limited act as the Sub-Investment Managers to the Fund.

Performance

From 1 October 2022 to 30 September 2023, the 'I' share class of Japan Selection Equity Fund returned 23.75% (net of fees) in JPY terms, compared to a return of 29.80% in JPY terms for the fund's benchmark (Topix).**

Market Review

Fears of a severe global recession proved unfounded, helped by a resilient U.S. economy and China's surprise zero-COVID pivot at the end of 2022. Headline inflation rates declined sharply over the 12 months under review, but core inflation proved far stickier. While the U.S. Federal Reserve and the European Central Bank hiked rates steeply, the pace of rate increases moderated as the period progressed. By the end of September 2023, U.S. and eurozone policymakers indicated that rates were at/near their peaks but dashed hopes of substantial cuts in 2024, indicating that interest rates would need to stay higher for longer to bring inflation back to target.

Architas Multi-Manager Global Funds Unit Trust Selection Japan Equity

Market Review (cont/d)

The Bank of Japan remained the outlier, sticking to its ultra-accommodative stance. The People's Bank of China also cut rates as China's economic rebound from the ending of all pandemic restrictions faded. Central banks in some other emerging markets, such as Brazil, also started to cut rates.

Equity Markets

Global equities rebounded over the period as fears of a global recession faded (MSCI World Index +13.40% in EUR), although the rally ran out of steam in the third quarter of 2023 as investors started to realise that hopes of rate cuts were premature.

U.S. equities led returns with the S&P 500 Index surging 21.60% in USD terms as growth stocks recovered sharply, helped in part by growing interest in artificial intelligence and its applications. European stocks also delivered robust gains (MSCI Europe Index +20.00% EUR) amid relief that the eurozone had managed to avoid a deep recession as it learned to live without Russian oil and gas. Japanese shares gained 17.00% in EUR terms (MSCI Japan Index), boosted by strong foreign demand due in part to corporate governance reforms. However, Chinese equities lagged, with the MSCI China Index dropping 2.40% in EUR terms as China's economic recovery ran out of steam in 2023.

The Fund produced a positive return however underperformed against its benchmark for the 12-month period ending 30 September 2023. The overall portfolio is fairly evenly diversified between the 3 underlying strategies. The largest position over this time was the value core holding (Nikko High Dividend) which outperformed the broad index. The growth focused Comgest strategy was the leading detractor for the period. As a growth strategy it was negatively impacted by rising inflation as well as the higher volatility affecting its smaller cap exposures. Comgest underperformed the style peer group and index. The core position (Jupiter Select) also lagged behind its style peer group and the broad index. Its lack of cyclical value within its core holdings and focus on stronger underlying fundamentals resulted in an underperformance of the broad index.

Depositary's Report to the Unitholders of Architas Multi-Manager Global Funds **Unit Trust**

Report of the Depositary to the Unitholders

We have enquired into the conduct of the Manager in respect of Architas Multi-Manager Global Funds Unit Trust (the "Trust") for the year ended 30 September 2023, in our capacity as Depositary to the Trust.

This report including the opinion has been prepared for and solely for the Unitholders in the Trust, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, ("the UCITS Regulations"), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Manager in each annual accounting period and report thereon to the Unitholders.

Our report shall state whether, in our opinion, the Trust has been managed in that period in accordance with the provisions of the Trust's Trust Deed and the UCITS Regulations. It is the overall responsibility of the Manager to comply with these provisions. If the Manager has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Trust has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Trust Deed and the appropriate regulations and (ii) otherwise in accordance with the Trust's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Trust has been managed during the year, in all material respects:

- in accordance with the limitations imposed on the investment and borrowing powers of the Manager and the Trustee by the Trust Deed, by the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 ('the Central Bank UCITS Regulations'); and
- (ii) otherwise in accordance with the provisions of the Trust Deed, the UCITS Regulations and the Central Bank UCITS

State Street Custodial Services (Ireland) Limited

78 Sir John Rogerson's Quay

Dublin 2 Ireland

29 January 2024

Independent auditors' report to the unitholders of the Funds of Architas Multi-Manager Global Funds Unit Trust

Report on the audit of the financial statements

Opinion

In our opinion, Architas Multi-Manager Global Funds Unit Trust's financial statements:

- give a true and fair view of the Funds' assets, liabilities and financial position as at 30 September 2023 and of their results for the year then ended;
- have been properly prepared in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law); and
- have been properly prepared in accordance with the requirements of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report and Audited Financial Statements, which comprise:

- the Statement of Financial Position as at 30 September 2023;
- the Statement of Comprehensive Income for the year then ended;
- the Statement of Changes in Net Assets Attributable to Redeemable Participating Unitholders/Statement of Changes in Equity for the year then ended;
- the Schedule of Investments for each of the Funds as at 30 September 2023; and
- the notes to the financial statements for each of the Funds, which include a description of the significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Trust in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Conclusions relating to going concern

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the manager's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the manager with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report and Audited Financial Statements other than the financial statements and our auditors' report thereon. The manager is responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

Responsibilities for the financial statements and the audit

Responsibilities of the manager for the financial statements

As explained more fully in the Statement of Manager's Responsibilities set out on page 6, the manager is responsible for the preparation of the financial statements in accordance with the applicable framework giving a true and fair view.

The manager is also responsible for such internal control as the manager determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the manager is responsible for assessing the Funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the manager intends to cease operations, or has no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description of auditors responsibilities for audit.pdf.

This description forms part of our auditors' report.

Use of this report

This report, including the opinion, has been prepared for and only for the unitholders of each of the Funds as a body in accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Net Assets attributable to redeemable participating Unitholders at the end of the year

1. **BASIS OF PRESENTATION**

Statement of compliance

The financial statements have been prepared under the historical cost convention as modified to include investments at fair value by the revaluation of financial assets and financial liabilities held at fair value through profit or loss.

These annual financial statements have been prepared on a going concern basis for the year ended 30 September 2023. The Directors of the Manager are of the view that the Trust can continue in operational existence for twelve months from the date of approval of these financial statements ("the period of assessment"). The Directors of the Manager anticipate the financial assets will continue to generate enough cash flows on an ongoing basis to meet the relevant Fund's liabilities as they fall due. In making this assessment, the Directors of the Manager considered the geopolitical tension in Ukraine, and subsequent events unfolding in Israel and Gaza, the macroeconomic trends (increases in interest rates and in inflation) and the volatility currently being experienced on financial markets in all asset classes, please refer to the background to the Trust section and the significant events during the year as detailed in Note 13.

These financial statements have been prepared in accordance with accounting standards generally accepted in Ireland ("Irish GAAP") including Financial Reporting Standard 102; the FRS applicable in the UK and Republic of Ireland ("FRS 102"), the Unit Trusts Act, 1990 and the UCITS Regulations. Accounting standards generally accepted in Ireland in preparing financial statements giving a true and fair view are those promulgated by the Institute of Chartered Accountants in Ireland and issued by the Financial Reporting Council ("FRC").

The Trust has availed of the exemption available to open-ended investment funds under FRS 102 and is not presenting a cash flow statement.

2. **ACCOUNTING POLICIES**

The preparation of financial statements requires the use of certain critical accounting estimates. It also requires the Directors of the Manager, based on the advice of the Investment Manager, to exercise its judgement in the process of applying the Trust's accounting policies. The areas involving a higher degree of judgement or complexity or areas where assumptions and estimates are significant to the financial statements are disclosed below.

Financial Instruments at Fair Value through Profit or Loss

This category has two sub-categories: financial assets and financial liabilities held for trading and those designated by the Manager at fair value through profit or loss at inception. All instruments on each Fund's Schedule of Investments are classified as fair value through profit or loss. Subsequent to initial recognition, all instruments classified at fair value through profit or loss are measured at fair value with changes in their fair value recognised in the Statement of Comprehensive Income.

(ii) Recognition/Derecognition

The Trust recognises financial assets and financial liabilities on the date it becomes a party to the contractual provisions of the instrument. Purchases of financial instruments are recognised using trade date accounting. From this date any gains and losses arising from changes in fair value of the financial assets or financial liabilities are recorded.

Financial instruments are derecognised when the rights to receive cash flows from the investments have expired or the Trust has transferred substantially all risks and rewards of ownership.

(iii) Measurement

Financial assets and financial liabilities at fair value through profit and loss are measured at fair value. The fair value of financial instruments traded in active markets (such as trading securities) is based on quoted mid prices for long fixed income positions and other valuation techniques where quoted mid prices are not available. Where any of the investments are not listed on recognised stock exchanges or traded on a regulated market, such securities shall be valued at their probable fair value as determined by the Manager or its delegate, each of them being approved by the Depositary as a competent person for such purpose.

Financial assets and financial liabilities designated at fair value through profit or loss at inception are those that are managed and their performance evaluated on a fair value basis in accordance with the Trust's documented investment strategy. The Trust's policy is for the relevant Investment Manager to evaluate the information about these financial assets on a fair value basis together with other related financial information.

(iv) Fair value estimation

The fair value of financial instruments traded in active markets is based upon market prices at the Statement of Financial Position date. The quoted market price used for financial assets held by each Fund is the current mid price.

Notes to the Financial Statements for the Year Ended 30 September 2023 (cont/d)

2. **ACCOUNTING POLICIES (cont/d)**

Financial Instruments at Fair Value through Profit or Loss (cont/d)

(iv) Fair value estimation (cont/d)

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The Manager uses a variety of methods and makes assumptions that are based on market conditions existing at each Statement of Financial Position date. Valuation techniques used include the use of comparable recent arm's length transactions, discounted cash flow analysis, and other valuation techniques commonly used by market participants.

If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the Manager uses that technique. Estimation methods and valuation models may be used to calculate fair value. Due to the dynamic nature of assumptions used in estimating fair value and market volatility, the values reflected in the financial statements for these investments may differ from the values that would be determined by negotiations held between parties in a near term sales transaction, and those differences could be material.

Investment Funds

Investments in open-ended investment funds are valued at fair value at the latest available unaudited NAV for the shares or Units obtained from the relevant administrator. The changes in the daily NAV of these Units is recognised as net gain/(loss) on financial instruments at fair value through profit or loss.

Cash, Broker Cash and Bank Overdraft

Cash at bank comprises current deposits with banks and bank overdrafts. Cash is also deposited by or on behalf of the fund for initial margin purposes with brokers for options and futures contracts and as collateral with counterparties for open financial derivative positions held on the relevant Funds as at 30 September 2023 and 30 September 2022. Cash equivalents and bank overdrafts are valued at their face value with accrued interest (where applicable).

Each Fund's assets may be pledged as collateral to, and held by the counterparty and brokers for open FDIs. Details of any collateral received by the Funds from the counterparties in respect of open FDIs held by the Funds, are disclosed at the base of the relevant Schedule of Investments.

Forward and Spot Foreign Currency Exchange Contracts

The fair value of open forward foreign currency exchange contracts and open foreign currency exchange spot contracts are calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the Statement of Financial Position date. For each relevant Fund, gains or losses on open foreign currency exchange spot contracts are included in cash at bank in the Statement of Financial Position and gains or losses on open forward foreign currency exchange contracts are included in the unrealised gain or loss on foreign currency exchange contracts, as appropriate, on the Statement of Financial Position and are shown in the Schedule of Investments of each relevant Fund. The movement in unrealised gains or losses since the prior year end and realised gains or losses are included in the Statement of Comprehensive Income for each relevant Fund.

Initial margin deposits are made upon entering into futures contracts and are generally made in cash or cash equivalents. The fair value of futures contracts is based upon their quoted daily settlement prices. Changes in the value of open futures contracts are recognised as unrealised gains or losses on open futures contracts until the contracts are terminated, at which time realised gains and losses are recognised. Gains or losses on open futures contracts are shown in the Schedule of Investments of each relevant Fund and as appropriate, on the Statement of Financial Position as financial assets and liabilities at fair value through profit or loss. The movement in unrealised gains or losses since the prior year end and realised gains or losses are included in the Statement of Comprehensive Income for each relevant Fund.

Total Return Swaps

A TRS is an agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains. In TRS, the underlying asset, referred to as the reference asset, is usually a stock or fixed income index. This is owned by the party receiving the set rate payment. TRS allow the party receiving the total return to gain exposure and benefit from a reference asset without actually having to own it. The notional amount of the swap contract is marked-tomarket to reflect the fair value of the swap which is reported as an asset or liability as appropriate on the Statement of Financial Position of each relevant Fund.

The net amounts of interest payments and receipts on swaps are included in realised gains/(losses) on financial assets at fair value in the Statement of Comprehensive Income.

Notes to the Financial Statements for the Year Ended 30 September 2023 (cont/d)

2. ACCOUNTING POLICIES (cont/d) TBA Purchase Commitments

The Fund may hold and maintain until settlement date, cash or high-grade debt obligations in an amount sufficient to meet the purchase price, or the Funds may enter into offsetting contracts for the forward sale of other securities they own. Income on the securities will not be earned until settlement date. TBA purchase commitments may be considered securities in themselves, and involve a risk of loss if the value of the security to be purchased declines prior to settlement date, the risk of which is in addition to the risk of decline in the value of a Fund's other assets. Unsettled TBA purchase commitments are valued at the current market value of the underlying securities. Although the Funds may enter into TBA purchase commitments with the intention of acquiring securities for their Funds or for delivery pursuant to options contracts they have entered into, the Funds may dispose of a commitment prior to settlement if the relevant Investment Manager deems it appropriate to do so.

Accounting for Investment Transactions

Regular-way purchases and sales of investments are recognised on trade date. The trade date is the date on which the Fund commits to purchase or sell the asset. Investments are initially recognised at fair value and transaction costs for all financial assets and financial liabilities carried at fair value through profit or loss are included in realised gains/(losses) on financial instruments at fair value through profit or loss in the Statement of Comprehensive Income.

Investments are recognised when the rights to receive cash flows from the investments are transferred to the Fund or the Fund has exposure to substantially all risks and rewards of ownership. Investments are derecognised when the rights to receive cash flows from the investments have expired or the Fund has transferred substantially all risks and rewards of ownership.

Realised gains and losses on investment transactions are calculated using the average cost method. Realised gains and losses on investment transactions in debt instruments are calculated as the difference between sales proceeds and the amortised cost of the instrument.

Interest income is recognised on a time-proportionate basis using the effective interest basis. It includes interest income from cash and cash equivalents and on debt securities at fair value through profit or loss.

Gains and losses realised on the sale of all financial assets and financial liabilities carried at fair value through profit or loss are recognised in the Statement of Comprehensive Income.

Dividend Income and Interest Income

Dividend income arising from investments are credited to the Statement of Comprehensive Income on an ex-dividend basis. Dividend income is shown gross of any non-recoverable withholding taxes, which are disclosed separately in the Statement of Comprehensive Income and net of any tax credits. Interest income is accrued on an effective yield basis. Interest on bank overdrafts is reflected as an interest expense under finance costs.

Expenses

Each Fund shall pay all of its expenses and such proportion of the Trust's expenses as is allocated to that Fund, other than those expressly assumed by the Manager. To the extent that expenses are attributable to a specific Unit class of a Fund, that Unit class shall bear such expenses. All expenses are accrued on a daily basis.

Transaction Costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or liability is recognised initially, an entity shall measure it at its fair value through profit or loss with transaction costs for such instruments being recognised directly in the Statement of Comprehensive Income.

Transaction costs charged by the Depositary on the settlement of purchases and sales of investments are included in "Depositary Fees" within operating expenses in the Statement of Comprehensive Income for each Fund. These costs are included in Note 6 'Fees and expenses' within the section 'Transaction Costs' for each relevant Fund.

Transaction costs on purchases and sales of equities, investment funds, open futures contracts and options are included in net gains/(losses) on financial instruments at fair value through profit or loss in the Statement of Comprehensive Income for each Fund. These costs include identifiable brokerage charges, commission, transaction related taxes and other market charges and are included in Note 6 'Fees and Expenses' within the section 'Transaction Costs' for each relevant Fund.

Transaction costs on the purchase and sale of bonds, open forward foreign currency exchange contracts and swaps are included in the purchase and sale price of the investment. These costs cannot be practically or reliably gathered as they are embedded in the cost of the investment and cannot be separately verified or disclosed.

Notes to the Financial Statements for the Year Ended 30 September 2023 (cont/d)

2. **ACCOUNTING POLICIES (cont/d)**

Foreign currency transactions

In accordance with FRS 102. Section 30 items included in the individual Fund's financial statements are measured using the currency of the primary economic environment in which it operates (functional currency). The Manager's selection of the functional currency is attributable to the functional currency being (a) where the Funds are mainly marketed and sold and (b) the common proxy for most clients in the Fund's varied client base. The functional currency assessment was done on a Fund by Fund basis. All Funds' base currencies equated to their respective functional currencies when assessed under FRS 102. Section 30.

Each individual Fund has also adopted its functional currency as the presentation currency. Foreign currency transactions are translated to the functional currency of the relevant Fund at the rate of exchange ruling on the date of the transaction.

For each relevant Fund:

- (i) Currency gains and losses can arise where there is a difference between the amounts of foreign dividends and interest recorded on the Fund's books and the Fund's functional currency equivalent to the amounts actually received or paid. These gains or losses are included where appropriate in the dividend and interest income figure in the Fund's Statement of Comprehensive Income;
- (ii) Currency gains and losses realised on securities purchase and sales transactions are included in realised gains/ (losses) on financial instruments at fair value through profit or loss in the relevant fund's Statement of Comprehensive Income:
- (iii) Unrealised currency gains and losses on securities held at year end are included in net change in unrealised gains/ (losses) on financial instruments at fair value through profit or loss in the relevant fund's Statement of Comprehensive Income; and
- (iv) Monetary assets and liabilities denominated in currencies other than the Fund's functional currency are translated at the rate of exchange ruling at the close of business on the relevant reporting date and exchange differences are included in net gain/(loss) on financial instruments in the relevant fund's Statement of Comprehensive Income.

Units in Issue

Equity Units and redeemable participating Units are redeemable at the Unitholder's option and are classified as equity or financial liabilities.

The Units of all Funds with the exception of AXA Selection Income, Architas Selection Bonds Core, Architas Selection Bonds Satellite, Architas Selection Equity, Architas World Ex-Japan Passive Bond, Architas Global Equity and AXA Capital Global Equity are classified as financial liabilities in accordance with FRS 102. The Units of AXA Selection Income, Architas Selection Bonds Core, Architas Selection Bonds Satellite, Architas Selection Equity, Architas World Ex-Japan Passive Bond, Architas Global Equity and AXA Capital Global Equity are classified as equity in accordance with FRS 102. The standard requires entities to classify puttable financial instruments, or components of instruments that impose on the entity an obligation to deliver to another party a pro rata share of the net assets of the entity only on liquidation, as equity, provided the financial instruments have particular features and meet specific conditions. The Units of the Funds listed above meet these specific conditions.

Distribution Policy

The Manager is empowered to declare and pay dividends on any class of Units in the Trust at its discretion. The AXA Selection Income Fund paid a distribution during the year ended 30 September 2023 and 30 September 2022. Please see Note 12 for details. There were no other dividends paid or payable for the year or prior year.

NUMBER OF UNITS IN ISSUE AND NET ASSETS 3. Redeemable Participating Units/Equity Units

Each Fund issues redeemable Units, which are redeemable at the holder's option and are classified as equity or financial liabilities. Redeemable Units can be put back to the relevant Fund at any time for cash equal to a proportionate Unit of the Fund's NAV. The redeemable Unit is carried at the redemption amount that is payable at the Statement of Financial Position date if the holder exercises the right to put the Unit back to the Fund. The relevant Fund's NAV per Unit is calculated by dividing the net assets attributable to redeemable participating Unitholders by the total number of outstanding redeemable Units.

CASH AT BANK 5.

Cash at bank comprises current deposits with banks and bank overdrafts. The counterparty for cash and deposits, including overnight deposits as at 30 September 2023 and 30 September 2022 was the Depositary.

Cash is also deposited by or on behalf of the Funds for initial margin purposes with brokers for options and futures contracts and as collateral with counterparties for open financial derivative positions held on the relevant Funds as at 30 September 2023 and 30 September 2022. Cash pledged by the Funds as collateral is recognised on the Statement of Financial Position as "Cash held with brokers for open financial derivative instruments".

FEES AND EXPENSES 6.

Manager Fees

The Trust has appointed AMMEL to undertake the management of the Trust.

Manager Fees pursuant to the Trust Deed

Pursuant to the Trust Deed dated 15 February 2011, the Manager is entitled to charge up to the amounts detailed below or to such a lesser amount as the Manager may agree for any class within a Fund in respect of its own fees, the fees of the relevant Investment Manager, the Administrator (including Registrar and Transfer Agency fees) and the Depositary (including any sub-custody fees). The Investment Managers will discharge the fees and expenses of any Sub-Investment Manager out of the fee received by it from the Manager.

Notes to the Financial Statements for the Year Ended 30 September 2023 (cont/d)

6. FEES AND EXPENSES (cont/d)

Manager Fees (cont/d)

The fees will be accrued daily based on the daily NAV of the underlying Fund attributable to the Unit class and will be paid monthly in arrears. To achieve this, the Manager will reimburse such portion of its fees and the other expenses of each Fund as is necessary to cause the annual total expenses of each class of Units of a Fund not to exceed the rates as set out in the table below.

Manager fees for the year were €24,696,395 (30 September 2022: €21,308,402) and the amount payable to the Manager at year end was €4,808,812 (30 September 2022: €3,973,743). Sub-Investment Manager fees for the year of €5,071,041 (30 September 2022: €5,687,983) and the amount payable to the Sub-Investment Managers at year end was €2,594,995 (30 September 2022: €1,225,740).

For the year ended 30 September 2023 there is a total reimbursement of expenses in accordance with the expense caps of €914,311 (30 September 2022: €1,041,170) due to the Trust by the Manager. The amount payable to the Trust by the Manager at the year end was €45,596 (30 September 2022: €144,290).

For the year ended 30 September 2023 there was an overpayment of expense reimbursements €47,214 (30 September 2022: €6,245) due to AMMEL. The amount payable to the Trust by the Manager at the year end was €45,596 (30 September 2022: €144,290), which is reflected in expense reimbursement receivable on the Statement of Financial Position.

In most instances where the Funds invest in other funds, rebate agreements are in place with the relevant Investment Manager to refund some or all of the management fee charged by the underlying fund. Please see Note 9 for the fee range, rebate expenses and amounts payable due to the Funds for the year ended 30 September 2023 and year ended 30 September 2022.

Administrator Fees

State Street Fund Services (Ireland) Limited is the Administrator. The Administrator is responsible for the daily determination of NAV, maintaining the books and records of the Funds in respect of the Trust and other administrative services.

Pursuant to the administration agreement, a fixed fee of €17,404 per annum per Fund is charged. A variable fee is also charged at a rate of up to 0.01913 per cent per annum on the first €550 million, a rate of up to 0.01340 per cent per annum on the next €550 million, a rate of up to 0.01480 per cent per annum on the next €1.10 billion and a rate of up to 0.00765 per cent per annum on the balance of the average daily NAV of the Trust. Where more than one Sub-Investment Manager has been appointed, an additional fee of €12,2020 per annum per Sub-Portfolio is charged.

A charge of €765 per Fund per annum is applied in connection with FRS 102 "Financial Instruments: Disclosure" requirements.

6. FEES AND EXPENSES (cont/d)

Depositary Fees

State Street Custodial Services (Ireland) Limited is the Depositary, Depositary fees are accrued and paid at a rate of 0.0077 per cent per annum on the first €5,500 million, a rate of 0.0057 per cent per annum on the next €5,500 million and a rate of 0.0046 per cent per annum on the balance of the average daily NAV of the Trust. Depositary fees accrue daily and are paid monthly in arrears.

The Depositary has appointed a network of local Sub-Custodian agents. The Sub-Custodian fees are paid at annual rates based on the total assets of the Trust held in each individual country in which the Funds invest plus applicable transaction charges. The total rate varies between 0.003 per cent and 0.55 per cent.

Transfer Agent Fees

The Manager has appointed State Street Fund Services (Ireland) Limited as registrar and transfer agent for the Trust pursuant to the Registrar and Transfer Agent Agreement between the Trust and the Transfer Agent. The day-to-day services provided to the Trust by the Transfer Agent include receiving and processing subscription and redemption orders, allotting, issuing and maintaining the Unitholder register for the Units. The Transfer Agent is paid a fee of €15,300 per annum in arrears out of the net assets of the Trust. The Transfer Agent Fee accrual also includes an Index Cost accrued on these Funds where relevant.

Operational Expenses

Each Fund shall pay all of its expenses and its due proportion of any allocated expenses. These expenses may include the costs of (i) fees relating to circulation details of the NAV and NAV per Unit, (ii) stamp duties, (iii) taxes, (iv) rating fees, (v) brokerage or other expenses of acquiring and disposing of investments, (vi) fees and expenses of the auditors, tax and other professional advisers, (vii) fees and expenses of any portfolio monitoring and/or proxy voting agents, (viii) registration fees, (ix) associated costs of printing and distribution of financial statements and related documentation, (x) translation fees, (xi) Central Bank fees and/or levies, (xii) fees connected with termination of the Trust, (xiii) post trade compliance monitoring, (xiv) OTC Derivatives Processing and (xv) other fees and expenses relating to management and administration of the Trust. These expenses are charged to the Statement of Comprehensive Income.

All the above fees are charged to and borne by each Fund.

Transaction Costs

As disclosed in Note 2, transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of the financial asset or financial liability.

For the year ended 30 September 2023, the Funds incurred identifiable transaction costs as follows:

| Tunnaction Coats | AXA Selection AllianceBernstein Dynamic Diversified EUR | AXA Selection Flexible EUR | AXA Selection Strategic Balanced EUR | AXA Selection Carmignac Convictions EUR | AXA Selection Income EUR | Architas Selection Bonds Core EUR |

7. **TAXATION**

Under current law and practice, the Trust qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act 1997 (as amended). On this basis, it is not chargeable to Irish tax on its relevant income or relevant gains.

However, Irish tax may arise on the happening of a 'chargeable event'. A chargeable event includes any distribution payments to Unitholders or any encashment, redemption, cancellation, repurchase or transfer of Units and any deemed disposal of Units for Irish tax purposes arising as a result of holding Units in the Trust for a period of eight years and on each eight year anniversary. Where a chargeable event occurs, the Trust is required to account for the Irish tax thereon.

No Irish tax will arise on the Trust in respect of chargeable events in respect of:

- a Unitholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes at the time of the (a) chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act 1997 (as amended) are held by the Trust or the Trust has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- (b) certain exempted Irish tax resident Unitholders who have provided the Trust with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments made by the Trust may be subject to taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Trust or its Unitholders.

FINANCIAL INSTRUMENTS: RISK DISCLOSURES 8.

The objective of FRS 102 "Financial Instruments: Disclosures" is to provide information about the Trust's exposure to material risks and how the Trust manages those risks. The Trust, in conjunction with the Investment Manager have determined that its material risks are market risk, credit risk and liquidity risk. Further details of these and other risks are set out below and in the Trust Deed under "Risk Factors".

The risks involved with investing in securities include changing economic conditions, industry and company conditions and security selection in addition to interest rate risk, credit risk, maturity risk and market risk. International securities are subject to changing exchange rates, less liquid markets and political and economic instability depending on the country.

Architas Multi-Manager Global Funds Unit Trust

Notes to the Financial Statements for the Year Ended 30 September 2023 (cont/d)

8. FINANCIAL INSTRUMENTS: RISK DISCLOSURES (cont/d)

A Fund may invest in shares of Investment Funds in accordance with its investment policy. Shares of Investment Funds are securities of other open-end or closed-end investment companies. Investing in other investment companies involves substantially the same risks as investing directly in the underlying instruments, but the total return on such investments at the Fund level may be reduced by the operating expenses and fees of such other investment companies, including advisory fees.

The Trust's overall risk management program seeks to minimise potential adverse effects on the Trust's performance.

Risk Framework

Architas Multi-Manager Europe Limited has a Risk and Control Framework in place which comprises a number of Committees and also incorporates control functions.

The Management Committee is a sub-committee of Architas Multi-Manager Europe Limited that has been appointed by the Board. The Board has delegated responsibility for oversight of the day to day management of the funds to this sub-committee. The sub-committee covers all aspects of the business and is chaired by Charles Lamb who is the Chief Executive Officer of Architas Multi-Manager Europe Limited.

The Investment Committee is a sub-committee of the Management Committee and focuses on reviewing Investment Strategy, Investment Risk and the performance of all Funds and appointed Sub-Investment Managers. The Investment Committee is chaired by the Senior Investment Manager and Designated Person for Investment Management.

The Business Development Committee is also a sub committee of the Management Committee. It is responsible for recommending the approval of new funds, monitoring existing funds and overseeing termination of funds where required.

The Pricing Committee is also a sub committee of the Management Committee. Its purpose is to approve/review the AMMEL Valuation Policy, to provide independent and broad-based oversight of fund pricing and to formally review pricing and valuation issues.

The Committee Structure is supported by independent control functions which include Risk and Compliance. In addition the Manager falls within the scope of AXA Group Internal Audit. Monthly reports are provided by the relevant business areas to the Management Committee, covering Investment, Distribution, Finance and Capital Management, Investment Risk, Operational Risk and Compliance and operational issues.

Market Risk

Market risk represents the uncertainty in the future market value of an investment portfolio. The management of market risk is an important and integral part of the Investment Managers' investment process. The Investment Managers use analytical techniques to limit the market risk of the portfolio while following the investment objective of the Fund. These techniques may include asset allocation analysis to diversify the risk exposure to the different fixed income sectors, equity sectors, or different geographical or industry sectors. Please refer to the Schedule of Investments on pages 104 to 178 for details of investments held as at year end.

Market risks are monitored against the quoted benchmarks and the permitted deviations as agreed in the Investment Management Agreement. Systems are in place at both the Investment Manager and Sub-Investment Manager level to monitor market risk. The Sub-Investment Manager reviews the portfolio on a regular basis using both quantitative and qualitative measures to ensure the strategies are in line with objectives. Corrective action where required may involve buying and selling of securities. Furthermore, all portfolios are monitored by our independent risk team and formally reviewed by the Manager's investment committee.

Funds adhere to guidelines concerning the investable universe and liquidity positions. The Investment Manager receives reports from sub-managers and performance is measured formally on a monthly basis.

The following table demonstrates the sensitivity of the Fund's profit/(loss) for the year to a reasonably possible change in market value of the Fund should the market have increased or decreased by 10% assuming all other variables remain constant. This represents management's best estimate of a reasonably possible shift.

Foreign Currency Risk

Foreign currency risk is the risk that the fair value of the future cash flows of a financial instrument will fluctuate because of changes in the rate of exchange between the currency in which the financial asset or financial liability is denominated and the functional currency of the Funds. The value of the investments of a Fund denominated in a currency other than the functional currency may rise and fall due to exchange rate fluctuations in respect of the relevant currencies. There is a risk that large exchange rate fluctuations may have a significant impact on the performance of the Funds.

Where a Fund holds investments in a currency other than that of the Fund's functional currency the relevant Investment Manager may manage foreign currency risk by either hedging foreign currency into the functional currency of the Fund or alternatively by diversifying investments across multiple currencies.

The following tables set out the Fund's net exposure to foreign currency other than the functional currency for both its monetary and non-monetary assets and liabilities as at 30 September 2023 and 30 September 2022.

Interest Rate Risk

Interest rate risk is the risk that future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Funds which hold fixed interest rate debt securities are exposed to interest rate risk where the value of these securities may fluctuate as a result of a change in interest rates. Holdings in floating and variable rate securities may also be subject to interest rate risk although to a lesser degree. The only Funds with significant exposure to interest rate risk are AXA Selection AllianceBernstein Dynamic Diversified, AXA Selection Flexible and Architas World Ex-Japan Passive Bond. These Funds invest in interest bearing financial assets and liabilities which expose them to risks associated with the effects of fluctuations in the prevailing levels of market interest rates on their financial positions and cash flows. The value of investments in fixed-rate interest bearing securities may be subject to price volatility due to changes in interest rates. Fluctuations in market interest rates will impact upon the level of interest received by a Fund from holdings in floating and variable rate securities.

An increase in interest rates will generally reduce the value of debt securities that are issued and outstanding, while a decline in interest rates will generally increase the value of debt securities that are issued and outstanding. The magnitude of these price fluctuations will be greater when the maturity of the outstanding securities is longer. Changes in the value of securities held by a Fund when interest rates change mean that a Fund's NAV per Unit can go up or down because of the effect on the value of the Fund's portfolio of debt securities. The Sub-Investment Manager monitors the interest-rate environment and evaluates risks on major strategies. Interest rate risk is controlled by monitoring maturities and duration relative to the Funds' investment guidelines. Techniques such as factor analysis and key rate duration measurement are used to evaluate portfolio risk. Duration is a measure of the sensitivity of the price of a fixed income investment to a change in interest rates. Duration, expressed as a number of years, is the weighted average maturity of all payments from a security, both coupon and principal, where the weights are the discounted present values of the payments.

The tables below summarise the Funds' significant exposure to interest rate risks. The Sub-Investment Managers use the macro risk factors mentioned earlier to estimate the impact of adverse changes in interest rates. The Funds' assets and liabilities are categorised by the earlier of contractual re-pricing or maturity dates. Non-interest bearing assets and liabilities are also included in the table.

The tables below summarise exposure of the AXA Selection AllianceBernstein Dynamic Diversified Fund, AXA Selection Flexible Fund and Architas World Ex-Japan Passive Bond interest rate risk as at 30 September 2023. It includes the Fund's assets and liabilities at fair value, by the earliest contractual repricing and maturity dates.

The following table demonstrates the sensitivity of the Fund's profit/(loss) for the year to a reasonably possible change in interest rates, with all other variables held constant.

The sensitivity of the profit/(loss) for the year is the effect of the assumed changes in interest rates increasing or decreasing by 0.25% on changes in fair value of investments for the year, based on revaluing fixed rate financial assets at the end of the reporting period. In practice, the actual trading results may differ from the below sensitivity analysis and the difference could be significant.

| | 30 September 2023 Duration | 30 September 2023 Sensitivity of changes in fair value of investments increase EUR | 30 September 2022 Duration | 30 September 2022 Sensitivity of changes in fair value of investments increase EUR |

Credit Risk

Credit risk is the risk that a counterparty to or issuer of a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Funds. The Trust will be exposed to credit risk on parties with whom it trades and will also bear the risk of settlement default. The Trust minimises concentrations of credit risk by undertaking transactions with a large number of customers and counterparties on recognised and reputable exchanges. All transactions in listed securities are settled/paid for upon delivery using approved brokers. The Sub-Investment Manager maintains a list of approved brokers that have been pre-certified. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation.

The main credit risk that the Funds are exposed to arises from the debt securities held by AXA Selection AllianceBernstein Dynamic Diversified, AXA Selection Flexible and Architas World Ex-Japan Passive Bond. The table below sets out a summary of the credit exposure based on credit ratings of the debt securities held in the Funds as at 30 September 2023 and 30 September 2022.

FDIs and cash held with brokers and counterparties have an exposure to counterparty risk such that the counterparty may become insolvent or otherwise incapable of meeting its obligations under a financial derivative instrument contract. This includes the legal risk arising from a contract being unenforceable. The names of the brokers and counterparties used by each individual Fund can be found at the base of each relevant Schedule of Investments. Cash is also deposited by or on behalf of the fund for initial margin purposes with brokers for futures contracts.

The following are the Standard & Poor's long-term credit ratings of the counterparties to the FDIs held by the Sub-Funds as at 30 September 2023 and 30 September 2022:

| Counterparty | 30 September 2023 | 30 September 2022 |

Each relevant Sub-Investment Manager conducts periodic reviews of the counterparties with whom they conduct transactions.

Substantially all of the cash balances, debt and equity securities held by the Funds are held via the Depositary with the exception of cash held with brokers and counterparties for open financial derivative instruments. State Street Bank and Trust Company act as the Global Custodian for the Depositary. Bankruptcy or insolvency by the Depositary may cause the Funds' rights with respect to the cash and debt securities held by the Depositary to be delayed or limited. The credit rating of the Depositary is highly rated by prominent rating agencies. If the credit quality or financial position of the Depositary deteriorates significantly, the Board of Directors of the Manager in conjunction with the Investment Manager will attempt to move the cash holdings to another bank.

Investment Funds entered into on behalf of the Funds with other parties and Cash entered into on behalf of the Funds with a counterparty are not held within the State Street depositary network. The Depositary are therefore not liable in any way for the default of any counterparty. The eligible Investment Funds in which the funds will invest in will be selected using qualitative and quantitative risk assessments that are determined by the Investment Manager.

The Trust's securities are always separately identified on the books and records of State Street Bank and Trust Company, therefore the rights, with respect to those securities, are preserved. Thus in the event of insolvency or bankruptcy of the Depositary, the Trust's assets are segregated and protected and this further reduces counterparty risk. Cash cannot be registered in the name of, or identified as beneficially owned by a client, nor can it practically be held in physical segregation, however, for all major currencies, the cash at the sub custodian is maintained in correspondent accounts of State Street Bank and Trust Company. The Trust's asset is a deposit with State Street Bank and Trust Company that is not conditioned upon the solvency of a correspondent bank.

Liquidity Risk

The Trust Deed provides for daily creation and cancellation of Units and the Funds are therefore exposed to the liquidity risk of meeting Unitholder redemptions at any time. The Trust invests the majority of its assets in investments that are traded in an active market and can be readily disposed of.

The Administrator monitors subscription and redemption volumes on a daily basis and notifies the relevant Investment Manager of significant movements and unusual trends as appropriate. The Trust can limit redemptions, if redemption requests on any dealing day (as defined in the Trust Deed) exceed 10% of the Units in issue in respect of any Fund.

8. FINANCIAL INSTRUMENTS: RISK DISCLOSURES (cont/d) Liquidity Risk (cont/d)

The Trust may defer the excess redemption requests to subsequent dealing days and shall redeem such Units rateably. The Trust has the ability to borrow in the short-term to ensure settlement. In accordance with the UCITS Regulations a Fund may not borrow money except as follows:

- A Fund may acquire foreign currency by means of a "back-to-back" loan; and (a)
- A Fund may borrow up to 10 % of its NAV provided that such borrowing is on a temporary basis. (b)

The Trust may at any time, on notice to the Depositary and the Central Bank, temporarily suspend the issue, valuation, sale, purchase, redemption and/or conversion of Units during any period when, as a result of political, economic, military or monetary events or any other circumstances outside the control, responsibility and power of the Manager, any disposal or valuation of Investments of the relevant Fund is not, in the opinion of the Manager, reasonably practicable without this being seriously detrimental to the interests of owners of Units in general or the owners of Units of the relevant Fund or if, in the opinion of the Manager, the redemption price cannot fairly be calculated or such disposal would be materially prejudicial to the owners of Units in general or the owners of Units of the relevant Fund; during which any breakdown occurs in the means of communication normally employed in determining the value of any of the Investments of the Trust or when for any other reason the value of any of the Investments or other assets of the relevant Fund cannot reasonably or fairly be ascertained.

All liabilities, including net assets attributable to redeemable participating Unitholders, as disclosed on the Funds' Statement of Financial Position are payable within three months of the year end date.

None of the liquidity management measures were invoked during the year ended 30 September 2023.

The tables below analyses the Fund's derivative financial instruments in a loss position for which the contractual maturities are considered to be essential to an understanding of the timing of cash flows based on the Fund's investment strategy as at 30 September 2023.

Capital risk management

The capital of each Fund is represented by the value of the Units issued to date. The amount of Units can change significantly on a daily basis, as each Fund is subject to daily subscriptions and redemptions at the discretion of Unitholders. The Fund's objective when managing capital is to safeguard the Fund's ability to continue as a going concern in order to provide returns for Unitholders, provide benefits for other stakeholders and maintain a strong capital base to support the development of the investment activities of the Fund.

Architas Multi-Manager Global Funds Unit Trust

Notes to the Financial Statements for the Year Ended 30 September 2023

8. FINANCIAL INSTRUMENTS: RISK DISCLOSURES (cont/d) Capital risk management (cont/d)

In order to maintain or adjust the capital structure, the Fund's policy is to perform the following:

- Monitor the level of daily subscriptions and redemptions relative to the assets it expects to be able to liquidate
- Redeem and issue new Units in accordance with the constitutional documents of the Fund, which include the ability to restrict redemptions and require certain minimum holdings and subscriptions.

The relevant Investment Manager and Sub-Investment Manager monitor capital on the basis of the value of the Units in issue.

Other Price Risk - Fair Value of Financial Assets and Financial Liabilities

The Trust has delegated responsibility for valuation of financial instruments to its Administrator. State Street Fund Services (Ireland) Limited. In addition, the Investment Managers' Pricing Committee (the "Committee") will provide guidance to the Administrator and to the Board of Directors of the Manager on valuation matters related to the Funds. Refer to Note 2 for further information on fair value estimation.

Fair Value Hierarchy

The fair value hierarchy as required under FRS 102 is based on the valuation inputs used to fair value the financial assets and liabilities and consideration of the market activity for each individual financial asset and liability. The definition for Levels 1, 2 and 3 are set out below.

Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.

Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly.

Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgment by the Trust. The Trust considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The following table analyses within the fair value hierarchy the Trust's financial assets measured at fair value at 30 September 2023:

Financial instruments for which there are no quoted market prices but that trade in markets that are active are valued based on market prices, dealer quotations or alternative pricing sources supported by observable inputs and are classified within Level 2. These include investment-grade corporate bonds, short-term bonds, non exchange traded investment funds, open forward foreign currency exchange contracts and TRS.

There were no investments classified as Level 3 as at 30 September 2023 other than Gazprom PJSC, Rosneft Oil Co PJSC and LUKOIL PJSC held on the AXA Capital Global Equity Fund with nil fair value.

In light of the ongoing conflict in Ukraine, a decision was made for the Russian based equity positions (Gazprom PJSC, LUKOIL PJSC and Rosneft PJSC) held on AXA Capital Global Equity Fund to be fair valued at zero from 10 March 2022 onwards. This valuation is being monitored by the AMMEL Pricing Committee. The assets were originally held as Depositary Receipts (Gazprom PJSC and LUKOIL PJSC - American Depositary Receipts, Rosneft PJSC - Global Depositary Receipt) but converted to the local Russian underlying security in July and August 2022. Subsequent to the decision to value these assets at zero, the Russian government introduced a law prohibiting non-Russian investors trading in Russian securities therefore Architas is unable to carry out any transactions on these holdings, as a result of associated EU sanctions, the assets are now classified as non-transferable securities. While vendor prices are available these are only valid for Russian Investors which supports the Architas Fair Value of zero approach. No other fund was impacted in relation to this matter.

Architas Multi-Manager Global Funds Unit Trust

Notes to the Financial Statements for the Year Ended 30 September 2023

8. FINANCIAL INSTRUMENTS: RISK DISCLOSURES (cont/d) Fair Value Hierarchy (cont/d)

In light of the ongoing conflict in Ukraine, a decision was made for the Russian based equity positions (Gazprom PJSC. LUKOIL PJSC and Rosneft PJSC) in the AXA Capital Global Equity Fund to be fair valued at zero from 10 March 2022 onwards. This valuation is being monitored by the AMMEL Pricing Committee. The assets were originally held as Depositary Receipts (Gazprom PJSC and LUKOIL PJSC - American Depositary Receipts, Rosneft PJSC - Global Depositary Receipt) but converted to the local Russian underlying security in July and August 2022. Subsequent to the decision to value these assets at zero, the Russian government introduced a law prohibiting non-Russian investors trading in Russian securities therefore Architas is unable to carry out any transactions on these holdings, and a result of associated EU sanctions, the assets are now classified as non-transferable securities. While vendor prices are available these are only valid for Russian Investors which supports the Architas Fair Value of zero approach. No other fund was impacted in relation to this matter

The relevant Investment Manager and/or the Sub-Manager monitors the global exposure of each Fund on a daily basis.

The global exposure can be calculated in 2 ways, using either:

- the Commitment Approach that calculates the incremental exposure generated by the instruments held in the Fund; or
- Value at Risk ("VaR"), where complex investment strategies are used. The VaR measure estimates the potential loss of the portfolio over a predefined period of time given a specified confidence level. The VaR methodology is a statistical measurement that produces a single aggregated result for the overall portfolio, taking into consideration the market volatilities of all the markets and assets as well as their correlations allowing for offsetting across different assets and markets. Where VaR is used, it is calculated by the sub-manager of the Fund.

VaR Monitoring:

AXA Selection AllianceBernstein Dynamic Diversified and AXA Selection Carmignac Convictions use Absolute VaR to monitor the overall risk in their portfolios.

AXA Selection AllianceBernstein Dynamic Diversified

| | 30 September 2023 | 30 September 2022 |
|---------------------------------------------------------|-------------------|-------------------|
| Global Exposure Monitoring Method | | |
| VaR % | 4.62% | 7.55% |
| Highest Utilisation | 40.10% | 45.45% |
| Lower Utilisation | 23.10% | 25.35% |
| Average Utilisation | 36.50% | 34.22% |
| Leverage (sum of the notionals of the derivatives used) | 109.45% | 83.09% |

Methodology: The Global Exposure for Architas AllianceBernstein Dynamic Diversified is calculated using the Absolute VaR approach. VaR is calculated using the RiskMetrics tool based on the 1 year data history prior to the calculation date, a left tail 99% confidence interval, using the Historical method over a 1-day horizon and scaled up to a 20 day horizon using the square root of time rule. The utilisation is calculated versus a maximum of 100.00%.

AXA Selection Carmignac Convictions

| | 30 September 2023 | 30 September 2022 |
|---------------------------------------------------------|-------------------|-------------------|
| Global Exposure Monitoring Method | | |
| VaR % | 4.82% | 3.69% |
| Highest Utilisation | 39.09% | 26.96% |
| Lower Utilisation | 18.26% | 15.55% |
| Average Utilisation | 31.70% | 21.17% |
| Leverage (sum of the notionals of the derivatives used) | 0.00% | 0.00% |

Methodology: The Global Exposure for Architas Carmignac Convictions is calculated using the Absolute VaR approach. VaR is calculated using the MSCI RiskManager 4 tool based on the 2 year data history prior to the calculation date, a left tail 99% confidence interval, using the Historical method over a 1-day horizon and scaled up to a 20 day horizon using the square root of time rule. The utilisation is calculated versus a maximum of 20.00%.

In accordance with ESMA Guidelines, the Fund's leverage during the year is calculated as the gross sum of the notional value of all derivative instruments used by the Fund, with the sum expressed as a percentage of a Fund's net assets. As a result of this calculation methodology, each Fund's level of leverage is overstated and not representative of the actual exposure represented by the derivative positions in the Fund. The leverage figure calculated takes the absolute sum of long and short derivative positions and sums them.

The Board, together with the Investment Manager will monitor the assets of each Fund to ensure that the global exposure and leverage will, at all times, remain within the limits set by the Central Bank.

FINANCIAL INSTRUMENTS: RISK DISCLOSURES (cont/d) 8. Leverage (cont/d)

Although VaR is an important tool for measuring market risk, the assumptions on which the model is based give rise to some limitations, including the following:

- The models are based on historical data and cannot take account of the fact that future market price movements, correlations between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns.
- The market price risk information is a relative estimate of risk rather than a precise and accurate number.
- The market price information represents a hypothetical outcome and is not intended to be predictive (in the case of probability-based methods, such as VaR, profits and losses are almost certain to exceed the reported amount with a frequency depending on the confidence interval chosen).
- Future market conditions could vary significantly from those experienced in the past.

All Funds with the exception of AXA Selection AllianceBernstein Dynamic Diversified and AXA Selection Carmignac Convictions, use the Commitment Approach to calculate the global exposure of each Fund.

9. **RELATED PARTY TRANSACTIONS**

Transactions with entities with significant influence

The Manager of the Funds is Architas Multi-Manager Europe Limited. The Manager was incorporated as a limited liability company on 8 September 2008 and is a wholly owned subsidiary of Architas Limited.

The Investment Managers have delegated the Investment Management function to Sub-Investment Managers with the exception of the AXA Selection Strategic Balanced, AXA Selection Income, Architas Selection Bonds Core, Architas Selection Bonds Satellite and Architas Selection Equity. See page 3 for the Sub-Investment Managers appointed to the Funds.

Manager fees for the year were €24,696,395 (30 September 2022: €21,308,402) and the amount payable to the Manager at year end was €4,808,812 (30 September 2022: €3,973,743). Sub-Investment Manager fees for the year of €5,071,041 (30 September 2022: €5,687,983) and the amount payable to the Sub-Investment Managers at year end was €2,594,995 (30 September 2022: €1,225,740).

For the year ended 30 September 2023 there is a total reimbursement of expenses in accordance with the expense caps of €914,311 (30 September 2022: €1,041,170) due to the Trust by the Manager. The amount payable to the Trust by the Manager at the year end was €45,596 (30 September 2022: €144,290).

Transactions with key management personnel

Matthieu André is a Director of the Manager and is also an employee of AXA Group Companies. Charles Lamb and Aoife McGee are Directors and also employees of the Manager. Peter Hazell and Julie O'Neill serve as independent nonexecutive Directors of other AXA Group companies. Jaime Arguello was a Director of the Manager and employee of AXA Group Companies until his resignation 30 August 2023.

Transactions with other related parties

For the year ended 30 September 2023 there are rebate expenses due to AXA Selection Strategic Balanced, AXA Selection Carmignac Convictions, AXA Selection Income, Architas Selection Bonds Core, Architas Selection Bonds Satellite, Architas Selection Equity, Selection European Equity, Selection US Equity, Selection Japan Equity and Architas Global Equity from the Manager. The rebate expenses for the year for AXA Selection Strategic Balanced are €35,554 (30 September 2022: €72,156), AXA Selection Carmignac Convictions €257,907 (30 September 2022: €266,516), AXA Selection Income €31,005 (30 September 2022: €87,882), Architas Selection Bonds Core €5,874 (30 September 2022: €2,848) and Architas Selection Equity €7,737 (30 September 2022: €Nil). The rebate amounts payable to the Funds by the Investment Manager at year end are AXA Selection Strategic Balanced €37,856 (30 September 2022: €127,317), AXA Selection Carmignac Convictions €120,698 (30 September 2022: €190,871), AXA Selection Income €31,453 (30 September 2022: €107,409), Architas Selection Bonds Core €2,340 (30 September 2022: €1,059) and Architas Selection Equity €1,057 (30 September 2022: €2,770).

All related party transactions detailed above in this note have been entered into in the ordinary course of business and on normal commercial terms.

10. EFFICIENT PORTFOLIO MANAGEMENT

Each Fund may utilise FDIs for investment purposes and/or for Efficient Portfolio Management ("EPM") purposes.

In addition to the investments in FDIs set down in Appendix II to the Prospectus and subject to the conditions and within the limits laid down by the Central Bank each Fund may employ techniques and instruments relating to transferable securities and money market instruments for EPM purposes. Transactions for the purposes of EPMs may be undertaken with a view to achieving a reduction in risk, a reduction in costs or an increase in capital or income returns to a Fund and may not be speculative in nature. These techniques and instruments may include investments in FDIs. New techniques and instruments may be developed which may be suitable for use by a Fund and the Manager may employ such techniques and instruments. With the exception of Selection European Equity the Funds did not utilise FDIs for EPM purposes during the year ended 30 September 2023 or the year ended 30 September 2022. The FDIs and other financial instruments note should be read in conjunction with the schedule of investments.

Architas Multi-Manager Global Funds Unit Trust

Notes to the Financial Statements for the Year Ended 30 September 2023 (cont/d)

10. EFFICIENT PORTFOLIO MANAGEMENT (cont/d)

Selection European Equity use Equity Index Futures Contracts to achieve targeted equity index exposure as well as to hedge unwanted equity index exposure. Equity index futures are exchange traded and carry the equity risk of the equity index. Equity index futures also carry basis risk and roll risk.

11. SOFT COMMISSION ARRANGEMENTS AND DIRECTED BROKERAGE

Soft commission transactions occur when the Investment Manager uses certain investment research services which assist in the management of the Fund's investments and which arrangements are paid for by certain brokers. These services may include, for example, research and analysis of the relative merits of individual shares or markets. In return, the Investment Manager places a proportion of business with these brokers including transactions relating to the Fund's investments. The Investment Manager has satisfied itself that it obtains best execution on behalf of the Funds and that these arrangements are to the benefit of the Funds.

There were soft commission arrangements during the year ended 30 September 2023 and year ended 30 September 2022 in the AXA Selection AllianceBernstein Dynamic Diversified and Selection US Equity Funds.

There were no directed brokerage arrangements entered into by the Investment Manager, on behalf of the Trust, during the year or during the previous year.

12. DISTRIBUTIONS

The Manager is empowered to declare and pay distributions on any class of Units in the Trust.

Distributions declared during the year were as follows:

| | 30 September 2023 | 30 September 2022 |
|----------------------|-------------------|-------------------|
| Fund | EUR | EUR |
| AXA Selection Income | 880,530 | 910,460 |

13. SIGNIFICANT EVENTS DURING THE YEAR END

The following 7 Funds became Article 8 under the SFDR on 30 November 2022 via the Central Bank fast track process: Selection Japan Equity, Selection US Equity, AXA Selection Income, Architas Global Equity, Architas Selection Bonds Core, Architas Selection Bonds Satellite and Architas Selection Equity.

The Trust updated its Supplements to the Prospectus on 30 November 2022, with the exception of Selection Japan Equity, which was updated on 7 February 2023.

Aoife McGee was appointed as a Director of the Manager on 30 August 2023.

Jaime Arguello resigned as a Director of the Manager on 30 August 2023.

There were no other significant events during the year.

14. SIGNIFICANT EVENTS SINCE THE YEAR END

AXA Capital Global Equity Fund Institutional Class I (USD) Units launched in 19 October 2023.

On the 22 December the Central Bank of Ireland approved an Acquiring Transaction, in relation to AMMEL, the fund management company for "Architas Multi-Manager Global Funds Unit Trust". There will be a change in the direct owner of AMMEL, which will result in AMMEL becoming part of the AXA Investment Managers group of entities. The ultimate beneficial owner of AXA SA will not change. It is anticipated that the change of direct owner will occur in Q1 2024.

On the 11 January 2024 Architas rebranded and are now known as AXA IM Select.

There were no other significant events since the year end.

15. APPROVAL OF THE FINANCIAL STATEMENTS

The financial statements were approved by the Manager on 29 January 2024.

Remuneration Policy Overview

The AMMEL Remuneration Policy is aligned to AXA group policy and has been designed to ensure that the AMMEL approach to remuneration does not encourage short term risk taking and aligns the client outcomes to the employee outcomes. It has been designed to be consistent with and promote sound and effective risk management and does not encourage risk taking which is inconsistent with the risk profiles or rules of the products/ portfolios managed by AMMEL.

The Policy and the practical application of the Policy is reviewed annually to ensure the Policy as designed is delivering on its stated objectives and outcomes. In 2022 this annual review did not identify any issues.

A summary of the AMMEL remuneration policy is available here:

https://select.axa-im.ie/globalassets/ireland/remuneration-policy/remuneration-policy-summary.pdf

Remuneration for the Financial Year 2022 (latest available remuneration figures)

- The total remuneration paid by AMMEL to staff was €2,506,352.
- This was allocated as Fixed 77% (€1,933,466) and Variable 23% (€572,886).
- The number of staff engaged during the period was 35 (including starters and leavers); and of the total number of staff, there were 10 identified staff (as defined in the policy including new starters and leavers throughout the year).
- The total remuneration paid to identified staff was €1,352,595 and other staff was €1,153,757.

Securities Financing Transactions Regulations (Unaudited)

Securities Financing Transactions Regulation (Regulation (EU) 2015/2365) ("SFTR") came into force on 12 January 2016 and, amongst other requirements, introduces new disclosure requirements in the Company's annual and semi-annual reports published after 13 January 2017 detailing the Company's use of securities financing transactions and total return swaps. Under Regulation (EU) 2015/2365 on transparency of securities financing transactions (SFTs) and of reuse, and amending Regulation (EU) No 648/2012, Article 13 requires UCITS investment companies to provide the following information on the use made of SFTs.

1. Market value of assets engaged in securities financing transactions as at 30 September 2023

Below is the amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount and as a proportion of the fund's Assets Under Management ("AUM").

| | Total Return | | % of |
|-----------------------------------------------------|--------------|-----------|---------|
| | Currency | Swaps | AUM |
| AXA Selection AllianceBernstein Dynamic Diversified | EUR | 5,154,539 | (0.10%) |

2. Listed below are the top 10 Counterparties used for the Total Return Swaps held as at 30 September 2023*

Architas Multi-Manager Global Funds Unit Trust

Appendix III - Sustainable Finance Disclosure Regulation (Unaudited)

SFDR (Sustainable Finance Disclosure Regulation) is a regulatory change that applies to all financial business and products to provide standardised disclosures on how ESG factors are integrated at both entity and product level. In addition, the EU Taxonomy Regulation (EU) 2019/2088 establishes a classification system (or taxonomy) which provides businesses with a common language to identify whether or not a given economic activity should be considered environmentally sustainable.

The investments underlying the Sub-Funds do not currently take into account the EU criteria for environmentally sustainable economic activities as defined by the Taxonomy regulation.

For updates on the Architas approach to SFDR please access our Sustainable Finance Disclosures Regulation Declarations on our website: https://select.axa-im.ie/

Through ensuring that the investment process promotes Environmental or Social characteristics all Sub-Funds in the Unit Trust are now transitioned to Article 8 with the exception of two. Architas World Ex-Japan Passive Bond and AXA Capital Global Equity Fund are categorised as Article 6 as at 30 September 2023, as they are Sub-Funds that neither promote environmental or social characteristics, nor have a sustainable investment objective.

All other Sub-Funds in the Unit Trust are classified as Article 8 and are listed below.

AXA Selection AllianceBernstein Dynamic Diversified AXA Selection Flexible
AXA Selection Strategic Balanced
AXA Selection Carmignac Convictions
AXA Selection Income
Architas Selection Bonds Core
Architas Selection Bonds Satellite
Architas Selection Equity
Architas Global Equity
Selection European Equity
Selection US Equity
Selection Japan Equity

The individual unaudited Sub-Fund SFDR reporting is available below. The Principal Adverse Impacts (PAIs), top investments, asset allocation and economic sectors in the reports are calculated based on an average of the quarter holdings.

The holdings therefore may not align exactly with the values contained in the statement of investments.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AXA Selection AllianceBernstein Dynamic Diversified (the "Sub-Fund") Legal entity identifier: 5493003T4LALHALXSN53

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes × No It made sustainable It promoted Environmental/Social (E/S) characteristics and while it did not have as investments with an its objective a sustainable investment, it environmental objective: % had a proportion of % of sustainable in economic activities that investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments with a It promoted E/S characteristics, but did not social objective: ____% make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee

companies

follow good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are

attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period (01/10/22 - 29/09/23), the Sub-Fund pursued an investment strategy that factors in certain environmental and social characteristics in the manner contemplated by Article 8 of the SFDR but does not have as its objective a sustainable investment as such term is understood in accordance with the SFDR. No index has been designated for the Sub-Fund as a reference benchmark for the purposes of the SFDR.

The application of the proprietary methodology enables the Sub-Fund to promote the mitigation of and adaptation to climate change as environmental characteristics and employee welfare and employee health and safety as social characteristics.

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: Investment Manager Alliance Bernstein (AB) used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Company.
- ESG Scoring: AB used a variety of proprietary scoring methodologies to score issuers using ESG Factors.

How did the sustainability indicators perform?

The Manager undertook an annual assessment of the Investment Manager's rationale for classifying as Article 8 in line with SFDR. The rationale was presented to the Manager's Responsible Investment Forum, which is open to all members of the investment team and the operational due diligence team, for validation. The rationale was found to be valid. Further the Investment Manager provided the following information about how it promoted Environmental & Social characteristics.

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, subject to satisfactory data and data sourcing. This includes, but is not limited to, reviewing, monitoring, and/or measuring the various ESG Factors or topics that are considered as part of the various quantitative and qualitative methodologies.

As of 30 September 2023, 89% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and 66% of the Portfolio was deemed to promote E/S Characteristics on the basis of this ESG research and scoring, as well as engagement on environmental and social issues.

This Portfolio has an investment strategy where the Investment Manager flexibly adjusts investment exposures across various assets classes with the goal of building an optimal risk/return profile in all market conditions. Accordingly, as market conditions change, the investment strategy and the way in which AB implement the strategy may evolve and adjust over time.

The Manager conducts an ESG due diligence assessment of the appointed Investment Manager's proprietary methodology for its allocation of the Sub-Fund. The assessment includes completion of the Manager's proprietary ESG questionnaire at the initial selection process by the appointed Investment Managers which covers:

- ESG policy and governance;
- ESG integration in investments;
- Engagement and stewardship; and
- · ESG risk and reporting.

In the reporting year, the ESG score continued to exceed the minimum ESG Score Threshold set by the Investment Manager which is a requirement to be investible.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Sub-Fund does not make any sustainable investments, in line with the pre-contractual disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

That question is not applicable for the Sub-Fund which doesn't consider principal adverse impacts on sustainability factors, in line with the pre-contractual information.

What were the top investments of this financial product?

Please note that the Top Holdings are calculated based on an average of the quarter end holdings and will therefore not align exactly with the holding values contained in the statement of investments. 4

What was the proportion of sustainability-related investments?

0%

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

Throughout the reference period, the Sub-Fund was invested in a globally diversified portfolio of securities and other financial instruments, including financial derivative instruments, that provide investment exposure to a variety of asset classes. The Sub-Fund intented to allocate a minimum of 51% to investments aligned with E/S characteristics.

- #1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- #2 Other includes the remainings investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environemental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Investments | % |
|------------------------|-------|
| Financials | 15.18 |
| Information Technology | 10.92 |
| Health Care | 6.66 |
| Consumer Discretionary | 6.23 |

| Real Estate | 4.3 |
| Communication Services | 3.47 |
| Consumer Staples | 3.12 |
| Energy | 1.99 |
| Materials | 1.78 |
| Utilities | 1.57 |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or lowcarbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. Enabling activities directly enable other activities to make a substantial contribution to environmental objective. Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best

performance.

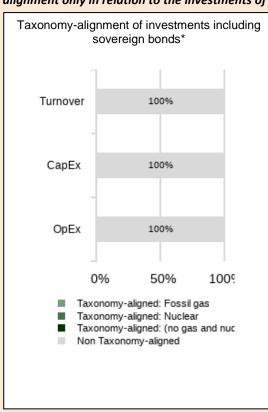

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

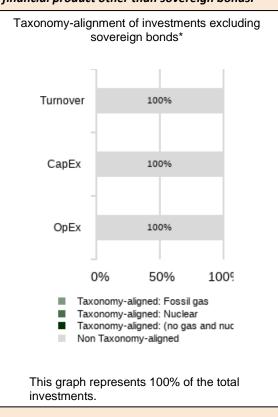

0 %

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy ?1

| Y | 'es | | | | |
|---|-----|----|--------|-----|------------------|
| | | In | fossil | gas | In nuclear energ |
| X | No | | | | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes can be held by the Portfolio in order to achieve its investment objective but are not deemed to promote E/S Characteristics, as outlined above, subject to satisfaction of AB's Good Governance Policy.
- Derivatives

For these assets, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the year, the Sub-Fund may have undergone allocation revisions in line with its sustainable process and the environmental and social characteristics promoted.

The Portfolio promoted E/S Characteristics by holding securities that AB believed promoted E/S Characteristics. A security was be deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration via evidenced ESG research and Engagements.
- ESG Scoring where issuers were scored using ESG Factors. As of 29 September 2023, 89% of the Portfolio had an ESG score.
- During the reference period, as applicable, all issuers of securities were compliant with AB's Good Governance Policy.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or

social

characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

| It made sustainable investments with a social objective:% | X It promoted E/S characteristics, but did not make any sustainable investments | | | | |

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund pursues an investment strategy that factors in certain environmental and social characteristics in the manner contemplated by Article 8 of the SFDR but does not have as its objective a sustainable investment as such term is understood in accordance with the SFDR. No index has been designated for the Sub-Fund as a reference benchmark for the purposes of the SFDR.

The Sub-Fund seeks to promote environmental characteristics (carbon intensity, exposure to thermal coal sector and carbon emissions reduction) and social characteristics (increased board gender diversity, consideration of UNGC fundamental principles and reduced controversial weapons exposure).

Through the Investment Manager's work and MSCI ESG Research ratings, the Sub-Fund considered a spectrum of criteria on ESG pillars, and more specifically on environmental characteristics (carbon intensity, exposure to thermal coal sector and carbon emissions reduction) and social characteristics (increased board gender diversity, consideration of UNGC fundamental principles and reduced controversial weapons exposure).

In addition, the investment teams seek to identify relevant material elements as part of the ex-ante analysis of the ESG profile and the assessment of the ex-post sustainable trajectory of the issuer and/or industry. Based on major dependencies and impacts, and as part of our generalist approach, the following elements can be considered: controversies (typology, severity and recurrence), externalities (carbon/toxic emissions, water consumption, destruction of biodiversity, accidents, layoffs, strikes, precarious contracts, fraud, etc.), and contributions (taxonomic alignment, participation in the United Nations Sustainable Development Goals, temperature in line with the Paris Agreement...).

How did the sustainability indicators perform?

The Manager undertook an annual assessment of the Investment Manager's rationale for classifying as Article 8 in line with SFDR. The rationale was presented to the Manager's Responsible Investment Forum, which is open to all members of the investment team and the operational due diligence team, for validation. The rationale was found to be valid.

Further the Investment Manager provided the following information about how it promoted Environmental & Social characteristics.

- ESG rating:

Portfolio (7,2/10; rating AA) vs Management universe (5,8/10; rating A)

- ESG score comparison by pillar:

E (Environmental Pillar): Fund 6/10 vs Universe 5,8/10

S (Social Pillar): Fund 6,2/10 vs Universe 4,8/10

G (Governance Pillar): 6,6/10 vs Universe 5,3/10

- Carbon intensity (Scope 1 & 2):

Fund (89 tons of CO2 per sales, in M€) vs Universe (290 tons of CO2 per sales, in M€)

- Low carbon Transition Management Score:

Fund (6,3/10) vs Universe (4,9/10)

*This score (from 0 to 10) evaluates a company's performance in terms of managing the risks and opportunities associated with the transition to a low carbon economy. It combines management assessments over the following key issues: (i) management of greenhouse gas emissions, (ii) carbon footprint of products and services. Higher the score is, more effectively the company's management is regarding these issues.

- Board gender diversity:

Fund (41 %) vs Universe (27%)

The Manager conducts an ESG due diligence assessment of the appointed Investment Manager's proprietary methodology for its allocation of the Sub-Fund. The assessment includes completion of the Manager's proprietary ESG questionnaire at the initial selection process by the appointed Investment Managers which covers:

- ESG policy and governance;
- ESG integration in investments;
- Engagement and stewardship; and
- ESG risk and reporting.

In the reporting year, the ESG score continued to exceed the minimum ESG Score Threshold set by the Investment Manager which is a requirement to be investible.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

That question is not applicable for the Sub-Fund which doesn't make any sustainable investments, in line with the pre-contractual information.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

 Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

Not applicable. This Sub-Fund does not make any sustainable investments, in line with the pre-contractual disclosures.

Please note that the Top Holdings are calculated based on an average of the quarter end holdings and will therefore not align exactly with the holding values contained in the statement of investments.

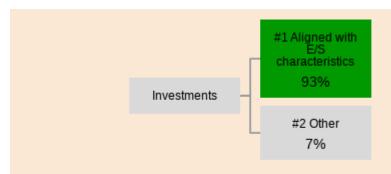

What was the proportion of sustainability-related investments?

0%

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

Throughout the reference period, the Sub-Fund was invested in interest-rate or convertible bond products (i.e. fixed income securities which can, at the option of the purchaser be converted into equity or equity-related securities), equities and UCITS. The Sub-Fund intented to allocate a minimum of 50% to investments aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remainings investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environemental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

|-------------|------|
| Health Care | 2.79 |
| Utilities | 2.75 |
| Real Estate | 1.23 |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or lowcarbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. Enabling activities directly enable other activities to make a substantial contribution to environmental objective. Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best

performance.

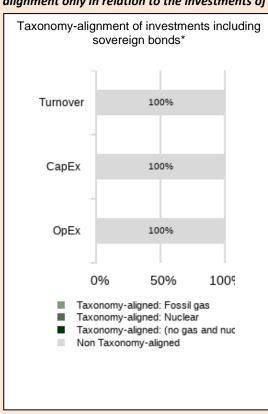

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

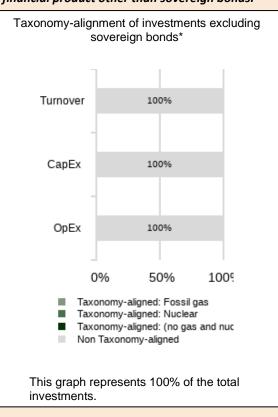

0%

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy ?1

| | Yes | | | | |
|---|-----|----|--------|-----|-------------------|
| | | In | fossil | gas | In nuclear energy |
| Χ | No | | | | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

are sustainable investments with an environmental objective that do not take into account the criteria for environmentall y sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

0%

What was the share of socially sustainable investments?

0%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other investments include non E/S characteristics investments and cash. Nevertheless, these investments all respect the Investment Manager's common exclusion framework, thus ensuring a minimum of ESG principles. These portfolio holdings are used to pursue the financial management objective of the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the year, the Sub-Fund may have undergone allocation revisions in line with its sustainable process and the environmental and social characteristics promoted.

These may have included changes in sector exposure and/or specific issuers, in connection with updates to the exclusion lists and/or investment cases, compliance with the product's sustainability requirements, controversy management and/or engagement actions.

The Investment Manager's Engagement and Voting Report looks back at the main engagement actions and voting decisions deployed during the year as well as examples of concrete cases that concerned the portfolios of Rothschild & Co Asset Management. It is available on the Investment Manager's website at the following address:

https://am.eu.rothschildandco.com/en/responsible-investing/external-documents-and-resources/

How did this financial product perform compared to the reference benchmark?

| It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | | | | |
| It made sustainable investments with a social objective:% | X It promoted E/S characteristics, but did not make any sustainable investments | | | | |

Sustainable investment means an investment in an economic activity that contributes to environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies

follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are

attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Throughout the reference period (from 01.10.2022 to 29.09.2023), the fund has pursued an investment strategy that favours, among other things, environmental or social characteristics, or a combination of these characteristics in accordance with article 8 of the SFDR.

The environmental or social characteristics which the Sub-Fund has sought to promote have been met by seeking to hold at least 80% of its Net Asset Value in Eligible CIS which are classified as either Article 8 (funds that promote E/S characteristics) or Article 9 (funds that have a sustainable investment objective) in line with the SFDR. No index has been designated for the Sub-Fund as a reference benchmark for the purposes of the SFDR.

The Sub-Fund is actively managed and is not subject to any limitation on the portion of its assets that may be exposed, through investment in Eligible CIS, to any one E/S characteristic or any one sustainable investment objective.

As part of the monitoring of constraints on funds, the risk function draws up and maintains a list of constraints configured in the position management tool (PMS - Bloomberg AIM).

Among these constraints, a minimum of 80% of underlying funds must be Article 8 or Article 9 funds is applied: this control is a blocking constraint which is followed both pretrade and post-trade on a weekly basis.

How did the sustainability indicators perform?

The sustainability indicators used to assess the fund's extra-financial performance were as follows:

1. The percentage of investment in underlying funds classified under article 8 (which promote environmental or social characteristics) and article 9 (which have a sustainable objective) in accordance with SFDR regulations.

This threshold of at least 80% of investments in products classified as article 8 or article 9 has been complied with over the reference period (01.10.2022 to 29.09.2023).

In order to verify compliance with this constraint, we have calculated an annual average per fund of investments in underlying funds being Article 8 or 9 at the end of each quarter. The result of this calculation shows a threshold of **99 %**.

- 2. The Investment Manager conducted an independent ESG due diligence process, which is a scored assessement, in respect of each target Eligible CIS (which is proprietary to the Investment Manager) which has covered:
 - ESG policy and governance

- ESG Integration
- Engagement and stewardship
- Risk and reporting

In the reporting year, all Eligible CIS met or exceeded the minimum ESG Score Threshold set by the Investment Manager which is a requirement to be investible.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

What was the share of socially sustainable investments?

0%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Over the period (01.10.2022 to 29.09.2023), "other" assets represented a maximum of 1% of net assets. These were mainly includes cash and SFDR Article 6 funds. Investments categorised as "Other" investments, were not subject to additional minimum ESG safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As Architas Multi-Manager Europe Limited is an open architecture manager, investment is mainly made through funds managed in funds of funds, while investment in direct securities remains marginal. The environmental or social characteristics which the Sub-Fund has sought to promote have been met by seeking to hold at least 80% of its Net Asset Value in Eligible CIS which are classified as either Article 8 (funds that promote E/S characteristics) or Article 9 (funds that have a sustainable investment objective) in line with the SFDR.

In selecting the funds in which to invest, our priority regarding the integration of these risks is to ensure that the management company of these funds has appropriate resources and experience that enable it to financially identify material sustainability risks. During the reporting period, sustainability risks were integrated into investment decisions through ESG due diligence of the fund manager and the fund.

The objective was to assess the ESG quality criteria of the funds by adding a dedicated questionnaire in the RFI-Request For Information process, followed by discussion with the manager to cover, among others: ESG policy and governance, ESG integration into investment decisions, engagement and stewardship, risk and reporting. The data collected enabled sector specialists to gain greater visibility into the reliability of the ESG process

(including by comparing with peers). Underlying funds that did not meet the ESG score threshold were not included in the "investable" universe of the sub-fund.

Sustainable investment means an

means an investment in an economic activity that contributes to environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are

attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period (01/10/22 - 29/09/23), AXA Selection Carmignac Conviction pursues an investment strategy that takes into account certain environmental and social characteristics as described by article 8 of the SFDR, but does not aim to be a sustainable investment according to the SFDR Regulation. AXA Selection Carmignac Convictions also favours investment in companies that follow good governance practices.

The Investment Manager has undertaken to invest at least 80% of the Net Asset Value in eligible UCITS (managed by the Investment Manager) classified as Article 8 or 9 in accordance with the SFDR Regulation and which seek to promote characteristics consistent with those promoted by AXA Selection Carmignac Convictions.

This section, representing at least 80% of the Axa Selection Carmignac Convictions fund, and invested in eligible UCITS classified as Article 8 or 9 in accordance with the SFDR regulation, applies "best-in-universe" (identification of companies offering sustainable activities) and "best-effort" (approach consisting of favouring issuers demonstrating an improvement or good prospects in their ESG practices and performance over time) approaches in order to invest sustainably by combining a strategy based on three pillars: 1) ESG integration, 2) negative screening, and 3) stewardship to promote environmental and social characteristics.

No breaches of the environmental and social characteristics were identified during the year.

How did the sustainability indicators perform?

The Manager undertook an annual assessment of the Investment Manager's rationale for classifying as Article 8 in line with SFDR. The rationale was presented to the Manager's Responsible Investment Forum, which is open to all members of the investment team and the operational due diligence team, for validation. The rationale was found to be valid. Further the Investment Manager provided the following information about how it promoted Environmental & Social characteristics.

This Sub-Fund has used the following sustainability indicators of its four pillar approach to measure the attainment of each of the environmental or social characteristics promoted:

The section, 80% of which is invested in eligible UCITS classified as Article 8 or 9 in accordance with the SFDR regulations of the Axa Selection Carmignac Convictions fund, has used the following sustainability indicators of its three pillar approach to measure the attainment of each of the environmental or social characteristics promoted :

1) The coverage rate of ESG analysis: ESG integration through ESG scoring using Carmignac's proprietary ESG platform "START" (System for Tracking and Analysis of a

Responsible Trajectory) is applied to at least 90% of issuers. As of 29/09/2023, the coverage rate of ESG analysis was systematically superior at 90% of issuers.

2) The amount the universe is reduced by (minimum 20% for the equities and corporate bonds section of the portfolio): Negative screening and exclusions of unsustainable activities and practices reflected in low ESG scores from START, MSCI and or ISS scores have been performed based on following indicators: (a) practices that are harmful to society and the environment, (b) controversies against the OECD business guidelines and UN Global compact principles, (c) controversial weapons (d) coal mining activity, (d) power companies that have not Paris alignment objectives in place, (e) companies involved in tobacco production, (f) companies involved in adult entertainment.

As of 29/09/2023, the Article 8 and 9 funds in which the Fund invests have negative screening, enabling their respective investment universes to be reduced by more than 20% (ranging from 20.2% to 40.2%).

3) Active stewardship: Environmental and social related company engagements leading to improvement in companies sustainability policies have been measured by following indicators: (a) level of active engagement and voting policies, (b) number of engagements, (c) rate of voting and (d) participation at shareholder and bondholder meetings). Carmignac engaged with 62 companies level between October 2022 and September 2023.

The Manager conducts an ESG due diligence assessment of the appointed Investment Manager's proprietary methodology for its allocation of the Sub-Fund. The assessment includes completion of the Manager's proprietary ESG questionnaire at the initial selection process by the appointed Investment Managers which covers:

- ESG policy and governance;
- · ESG integration in investments;
- Engagement and stewardship; and
- · ESG risk and reporting.

In the reporting year, the ESG score continued to exceed the minimum ESG Score Threshold set by the Investment Manager which is a requirement to be investible.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

Not applicable. This Sub-Fund does not make any sustainable investments, in line with the pre-contractual disclosures.

What was the proportion of sustainability-related investments?

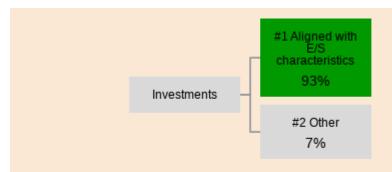

0%

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 29/09/2023, 93% of the fund's investments were made in underlying funds that promote environmental/social characteristics (Article 8 funds) and/or investment funds that have a sustainable investment objective (Article 9 funds), in accordance with the binding elements of the investment strategy,

The #2 Other investments correspond to investments outside the minimum limit of 80% integrating environmental and social characteristics, i.e. a maximum of 20% of the fund. These other investments, up to 7% of the fund as of 29/09/2023, include cash, eligible UCIs classified under Article 6 of the SFDR Regulation and derivatives used for investment, efficient portfolio management and/or hedging purposes. Investments classified in the "Other" category are not subject to additional ESG protection measures.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remainings investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environemental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

are sustainable investments with an environmental objective that do not take into account the criteria for environmentall y sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

0%

What was the share of socially sustainable investments?

0%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining portion of the portfolio (outside the minimum proportion of 80%) may also promote environmental and social characteristics but are not systematically covered by ESG analysis. Such assets may include cash, eligible UCIs classified under Article 6 of the SFDR Regulation and derivatives used for investment, efficient portfolio management and/or hedging purposes.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The below listed actions were conducted at Carmignac during the reference period (01/10/22 - 29/09/23), in order to support the investment process in meeting environnemental /social characteristics :

Pillar 1: ESG Integration

- Addition of supplementary Social indicators and proprietary sovereign ESG scoring models in the Investment Manager's proprietary ESG scoring process
- Improved tracking capacity of Green, Social, Sustainability, and Sustainability linked bonds to help monitor and produce future reporting in the Global Portfolio Monitoring system
- Integration of Principal Adverse Impacts monitoring and initiation of a policy at Investment Manager level
 - Increased automated monitoring of the universe reduction process.

Pillar 2: Exclusions

• Automation of the quarterly review process of the list to identify companies that would be subject to the sector or controversy hard exclusions and the universe reduction process if relevant.

Pillar 3: Voting and Engagement

- Introduction of a 'key vote' approach to prioritise companies that are identified for more focused voting recommendations and potential engagements related to vote decision, in particular "Say on climate" votes
 - Launch of quarterly Stewardship newsletters
- Continuation of quarterly corporate engagement plan for which close to 58% were related to either Environmental or Social or Governance thematic-related issues.

Sustainable investment

means an investment in an economic activity that contributes to environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are

attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Throughout the reference period (from 01.10.2022 to 29.09.2023), the fund has pursued an investment strategy that favours, among other things, environmental or social characteristics, or a combination of these characteristics in accordance with article 8 of the SFDR.

The environmental or social characteristics which the Sub-Fund has sought to promote have been met by seeking to hold at least 80% of its Net Asset Value in Eligible CIS which are classified as either Article 8 (funds that promote E/S characteristics) or Article 9 (funds that have a sustainable investment objective) in line with the SFDR. No index has been designated for the Sub-Fund as a reference benchmark for the purposes of the SFDR.

The Sub-Fund is actively managed and is not subject to any limitation on the portion of its assets that may be exposed, through investment in Eligible CIS, to any one E/S characteristic or any one sustainable investment objective.

As part of the monitoring of constraints on funds, the risk function draws up and maintains a list of constraints configured in the position management tool (PMS - Bloomberg AIM).

Among these constraints, a minimum of 80% of underlying funds must be Article 8 or Article 9 funds is applied: this control is a blocking constraint which is followed both pretrade and post-trade on a weekly basis.

How did the sustainability indicators perform?

The sustainability indicators used to assess the fund's extra-financial performance were as follows:

1. The percentage of investment in underlying funds classified under article 8 (which promote environmental or social characteristics) and article 9 (which have a sustainable objective) in accordance with SFDR regulations.

This threshold of at least 80% of investments in products classified as article 8 or article 9 has been complied with over the reference period (01.10.2022 to 29.09.2023).

In order to verify compliance with this constraint, we have calculated an annual average per fund of investments in underlying funds being Article 8 or 9 at the end of each quarter. The result of this calculation shows a threshold of **89 %**.

- **2.** The Investment Manager conducted an independent ESG due diligence process, which is a scored assessement, in respect of each target Eligible CIS (which is proprietary to the Investment Manager) which has covered:
 - ESG policy and governance

- ESG Integration
- Engagement and stewardship
- Risk and reporting

In the reporting year, all Eligible CIS met or exceeded the minimum ESG Score Threshold set by the Investment Manager which is a requirement to be investible.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Over the period (01.10.2022 to 29.09.2023), "other" assets represented a maximum of 11% of net assets. These were mainly includes cash and SFDR Article 6 funds. Investments categorised as "Other" investments, were not subject to additional minimum ESG safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As Architas Multi-Manager Europe Limited is an open architecture manager, investment is mainly made through funds managed in funds of funds, while investment in direct securities remains marginal. The environmental or social characteristics which the Sub-Fund has sought to promote have been met by seeking to hold at least 80% of its Net Asset Value in Eligible CIS which are classified as either Article 8 (funds that promote E/S characteristics) or Article 9 (funds that have a sustainable investment objective) in line with the SFDR.

In selecting the funds in which to invest, our priority regarding the integration of these risks is to ensure that the management company of these funds has appropriate resources and experience that enable it to financially identify material sustainability risks. During the reporting period, sustainability risks were integrated into investment decisions through ESG due diligence of the fund manager and the fund.

The objective was to assess the ESG quality criteria of the funds by adding a dedicated questionnaire in the RFI-Request For Information process, followed by discussion with the manager to cover, among others: ESG policy and governance, ESG integration into investment decisions, engagement and stewardship, risk and reporting. The data collected enabled sector specialists to gain greater visibility into the reliability of the ESG process (including by comparing with peers). Underlying funds that did not meet the ESG score threshold were not included in the "investable" universe of the sub-fund.

As Architas Multi-Manager Europe Limited is an open architecture manager, investment is mainly made through funds managed in funds of funds, while investment in direct securities remains marginal. The environmental or social characteristics which the Sub-Fund has sought to promote have been met by seeking to hold at least 80% of its Net Asset Value in Eligible CIS which are classified as either Article 8 (funds that promote E/S characteristics) or Article 9 (funds that have a sustainable investment objective) in line with the SFDR.

In selecting the funds in which to invest, our priority regarding the integration of these risks is to ensure that the management company of these funds has appropriate resources and experience that enable it to financially identify material sustainability risks. During the reporting period, sustainability risks were integrated into investment decisions through ESG due diligence of the fund manager and the fund.

The objective was to assess the ESG quality criteria of the funds by adding a dedicated questionnaire in the RFI-Request For Information process, followed by discussion with the manager to cover, among others: ESG policy and governance, ESG integration into

investment decisions, engagement and stewardship, risk and reporting. The data collected enabled sector specialists to gain greater visibility into the reliability of the ESG process (including by comparing with peers). Underlying funds that did not meet the ESG score threshold were not included in the "investable" universe of the sub-fund.

| Did this financial product have a sustai | nable investment objective? |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Yes | ● ○ 🗶 No |
| investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy |
| It made sustainable investments with a social objective:% | with a social objective X It promoted E/S characteristics, but did not make any sustainable investments |

Sustainable investment

means an investment in an economic activity that contributes to environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are

attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Throughout the reference period (from 01.10.2022 to 29.09.2023), the fund has pursued an investment strategy that favours, among other things, environmental or social characteristics, or a combination of these characteristics in accordance with article 8 of the SFDR.

The environmental or social characteristics which the Sub-Fund has sought to promote have been met by seeking to hold at least 80% of its Net Asset Value in Eligible CIS which are classified as either Article 8 (funds that promote E/S characteristics) or Article 9 (funds that have a sustainable investment objective) in line with the SFDR. No index has been designated for the Sub-Fund as a reference benchmark for the purposes of the SFDR.

The Sub-Fund is actively managed and is not subject to any limitation on the portion of its assets that may be exposed, through investment in Eligible CIS, to any one E/S characteristic or any one sustainable investment objective.

As part of the monitoring of constraints on funds, the risk function draws up and maintains a list of constraints configured in the position management tool (PMS - Bloomberg AIM).

Among these constraints, a minimum of 80% of underlying funds must be Article 8 or Article 9 funds is applied: this control is a blocking constraint which is followed both pretrade and post-trade on a weekly basis.

How did the sustainability indicators perform?

The sustainability indicators used to assess the fund's extra-financial performance were as follows:

1. The percentage of investment in underlying funds classified under article 8 (which promote environmental or social characteristics) and article 9 (which have a sustainable objective) in accordance with SFDR regulations.

This threshold of at least 80% of investments in products classified as article 8 or article 9 has been complied with over the reference period (01.10.2022 to 29.09.2023).

In order to verify compliance with this constraint, we have calculated an annual average per fund of investments in underlying funds being Article 8 or 9 at the end of each quarter. The result of this calculation shows a threshold of **83 %.**

- **2.** The Investment Manager conducted an independent ESG due diligence process, which is a scored assessement, in respect of each target Eligible CIS (which is proprietary to the Investment Manager) which has covered:
 - ESG policy and governance

- ESG Integration
- Engagement and stewardship
- Risk and reporting

In the reporting year, all Eligible CIS met or exceeded the minimum ESG Score Threshold set by the Investment Manager which is a requirement to be investible.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

What was the proportion of sustainability-related investments?

0%

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

Throughout the reference period, the fund held an average of 83 % of underlying funds classified as Article 8 or Article 9 under the SFDR Regulation.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remainings investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environemental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

As the Fund is managed on a multi-management basis (fund of funds structure), investments have mainly in underlying funds. Given this structure we are unable to provide any relevant answers.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or lowcarbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. Enabling activities directly enable other activities to make a substantial contribution to environmental objective. Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

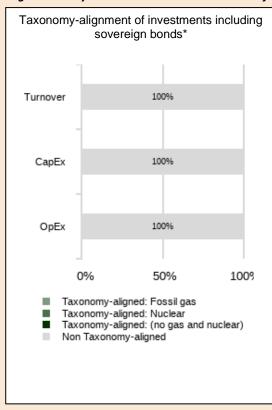

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

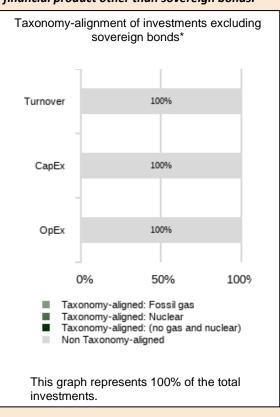

0 %

| It made sustainable investments with a social objective:% | with a social objective X It promoted E/S characteristics, but did not make any sustainable investments |

Sustainable investment means an

investment in an economic activity that contributes to environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are

attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period (01/10/22 - 29/09/23), the Sub-Fund pursued, an investment strategy that factors in certain environmental and social characteristics in the manner contemplated by Article 8 of the SFDR but does not have as its objective a sustainable investment as such term is understood in accordance with the SFDR. No index has been designated for the Sub-Fund as a reference benchmark for the purposes of the SFDR.

For the portion of the Sub-Fund allocated to appointed Investment Managers: The environmental and social characteristics the Sub-Fund seeks to promote are met by the binding implementation of the exclusions section of the AXA Group Responsible Investment Policy and also by the implementation of the proprietary methodology of the Investment Manager.

Environmental characteristics may include, but are not limited to, mitigation of and adaptation to climate change.

Social characteristics may include, but are not limited to, employee welfare and investment that contributes to tackling inequality.

How did the sustainability indicators perform?

The Manager undertook an annual assessment of the Investment Manager's rationale for classifying as Article 8 in line with SFDR. The rationale was presented to the Manager's Responsible Investment Forum, which is open to all members of the investment team and the operational due diligence team, for validation. The rationale was found to be valid.

The Manager conducts an ESG due diligence assessment of the appointed Investment Manager's proprietary methodology for its allocation of the Sub-Fund. The assessment includes completion of the Manager's proprietary ESG questionnaire at the initial selection process by the appointed Investment Managers which covers:

- ESG policy and governance;
- ESG integration in investments;
- · Engagement and stewardship; and
- · ESG risk and reporting.

In the reporting year, the ESG score continued to exceed the minimum ESG Score Threshold set by the Investment Manager which is a requirement to be investible.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

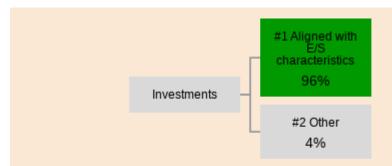

Throughout the reference period, the Sub-Fund was invested in a diversified and actively managed portfolio of equities by investing in Eligible CIS and/or making direct investments.

The Eligible CIS in which the Sub-Fund will invest will provide the Sub-Fund with exposure to equities and equity-related securities, common stocks, preferred stocks, warrants, American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs").

For the portion of the Net Asset Value of the Sub-Fund invested in Eligible CIS, it was intended that at least 80% of the investments of the Sub-Fund will be in underlying funds that promote E/S characteristics (Article 8 funds) and / or investment funds that have a sustainable investment objective (Article 9 funds).

In addition to the investments in Eligible CIS, the Sub-Fund may also invest directly in equities, equity-related securities and cash and cash equivalents.

For the portion of the Sub-Fund invested in direct investments, the Sub-Fund planned to allocate at least 80% to investments aligned with E/S characteristics.

- #1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- #2 Other includes the remainings investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environemental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Investments | % |
|------------------------|-------|
| Information Technology | 24.16 |
| Consumer Discretionary | 16.23 |
| Health Care | 12.35 |
| Communication Services | 10.99 |
| Industrials | 9.92 |
| Financials | 8 |
| Consumer Staples | 4.13 |
| Materials | 3.01 |
| Energy | 2.07 |
| Real Estate | 1.98 |
| Utilities | 0.69 |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or lowcarbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. Enabling activities directly enable other activities to make a substantial contribution to environmental objective. Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

| | Yes | | | | |
|---|-----|----|--------|-----|-------------------|
| | | In | fossil | gas | In nuclear energy |
| Χ | No | | | | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

0%

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

0%

What was the share of socially sustainable investments?

0%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other investments include cash and cash equivalents, Eligible CIS classified under Article 6 of the SFDR and derivatives, utilised for investment purposes or efficient portfolio management purposes. Investments categorised as "Other" investments, are not subject to additional minimum ESG safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period (01/10/22-29/09/23), several actions were taken to meet the environmental and/or social characteristics:

For the portion of the Net Asset Value of the Sub-Fund invested in Eligible CIS:

The environmental or social characteristics which the Sub-Fund has sought to promote have been met by seeking to hold at least 80% of its Net Asset Value in Eligible CIS which are classified as either Article 8 (funds that promote E/S characteristics) or Article 9 (funds that have a sustainable investment objective) in line with the SFDR.

In selecting the funds in which to invest, our priority regarding the integration of these risks is to ensure that the management company of these funds has appropriate resources and experience that enable it to financially identify material sustainability risks. During the reporting period, sustainability risks were integrated into investment decisions through ESG due diligence of the fund manager and the fund.

The objective was to assess the ESG quality criteria of the funds by adding a dedicated questionnaire in the RFI-Request For Information process, followed by discussion with the manager to cover, among others: ESG policy and governance, ESG integration into investment decisions, engagement and stewardship, risk and reporting. The data collected enabled sector specialists to gain greater visibility into the reliability of the ESG process (including by comparing with peers). Underlying funds that did not meet the ESG score threshold were not included in the "investable" universe of the sub-fund.

For the portion of the Sub-Fund allocated to appointed Investment Managers :

During the reference period, the Manager used internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening was performed pre-trade, intra-day, and in an overnight post-trade process.

Sustainable investment

means an investment in an economic activity that contributes to environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are

attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period (01/10/22 - 29/09/23), the Sub-Fund pursued an investment strategy that factors in certain environmental and social characteristics in the manner contemplated by Article 8 of the SFDR but does not have as its objective a sustainable investment as such term is understood in accordance with the SFDR. No index has been designated for the Sub-Fund as a reference benchmark for the purposes of the SFDR.

The environmental and social characteristics the Sub-Fund seeks to promote are met by the binding implementation of the exclusions section of the AXA Group Responsible Investment Policy and also by the implementation of the proprietary methodology of each of the Investment Managers. Further information about the latter is presented below.

Environmental characteristics may include, but are not limited to, mitigation of and adaptation to climate change.

Social characteristics may include, but are not limited to, employee welfare and investment that contributes to tackling inequality.

How did the sustainability indicators perform?

The Manager undertook an annual assessment of the Investment Manager's rationale for classifying as Article 8 in line with SFDR. The rationale was presented to the Manager's Responsible Investment Forum, which is open to all members of the investment team and the operational due diligence team, for validation. The rationale was found to be valid.

The Manager conducts an ESG due diligence assessment of the appointed Investment Manager's proprietary methodology for its allocation of the Sub-Fund. The assessment includes completion of the Manager's proprietary ESG questionnaire at the initial selection process by the appointed Investment Managers which covers:

- · ESG policy and governance;
- · ESG integration in investments;
- · Engagement and stewardship; and
- · ESG risk and reporting.

In the reporting year, the ESG score continued to exceed the minimum ESG Score Threshold set by the Investment Manager which is a requirement to be investible.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

Not applicable. This Sub-Fund does not make any sustainable investments, in line with the pre-contractual disclosures.

What were the top investments of this financial product?

The list includes the investments constituting

includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/10/22-29/09/23

Please note that the Top Holdings are calculated based on an average of the quarter end holdings and will therefore not align exactly with the holding values contained in the statement of investments.

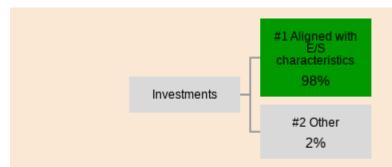

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

At the end of September 2023, 98 % of the Sub-Fund's assets were aligned with the environmental and social characteristics promoted. The Sub-Fund was primarily invested in direct holdings of listed equities.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remainings investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environemental or social characteristics that do not qualify as sustainable investments.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentall y sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

0%

What was the share of socially sustainable investments?

0%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As at end of September 2023, investments under "#2 Other" included cash, cash equivalents and FX spot for liquidity purposes. These investments were used to achieve the investment objective of the Sub-Fund, neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments. These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period (01/10/22-29/09/23), several actions were taken to meet the environmental and/or social characteristics. Aside from application of the exclusions as mentioned above, each of the two Investment Managers undertook the following actions:

<u>COMGEST mandate</u>:

Engagement activities:

Maintaining an active relationship with investee companies is a key element of the Investment Manager's investment process.

For the one year period to 29 September 2023, 13 engagement activities were carried out with 11 companies in the Sub-Fund to encourage best practices with regard to ESG topics or further exchange ESG information.

23.08% of the engagement activities were related to Environmental topics, 7.69% to Social topics, 7.69% to Governance topics and 61.54% to combined ESG topics.

Voting activities:

Comgest exercises its right to vote at shareholder meetings in accordance with corporate governance values and voting principles that have been determined by Comgest with reference to regulations, industry standards and best practice. Comgest's objective is to vote systematically at all shareholder meetings when it is technically possible to do so.

For the one year period to 29 September 2023, Comgest exercised its voting rights at 95.35% of shareholders' meeting for companies held by the Fund.

GOLDMAN SACHS AM mandate:

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Sustainable investment means an investment in an economic activity that contributes to

or social objective, provided that the investment does not significantly harm any environmental

or social objective and that the investee companies follow good governance practices.

environmental

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are

attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period (01/10/22 - 29/09/23), the Sub-Fund pursued an investment strategy that factors in certain environmental and social characteristics in the manner contemplated by Article 8 of the SFDR but does not have as its objective a sustainable investment as such term if understood in accordance with the SFDR. No index has been designated for the Sub-Fund as a reference benchmark for the purposes of the SFDR.

The environmental and social characteristics the Sub-Fund seeks to promote are met by the binding implementation of the exclusions section of the AXA Group Responsible Investment Policy and also by the implementation of the proprietary methodology of each of the Investment Managers.

Environmental characteristics may include, but are not limited to, mitigation of and adaptation to climate change.

Social characteristics may include, but are not limited to, employee welfare and investment that contributes to tackling inequality.

ALLIANCE BERNSTEIN Mandate:

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Company.

JACOBS LEVY Mandate:

Aside from implementation of the Exclusions, the investment guidelines also include a carbon reduction objective, described below.

JP MORGAN Mandate:

The Strategy met its pre-contractual committed minimums related to environmental and/or social characteristics throughout the reference period, including the Strategy applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period.

How did the sustainability indicators perform?

The Manager undertook an annual assessment of the Investment Manager's rationale for classifying as Article 8 in line with SFDR. The rationale was presented to the Manager's Responsible Investment Forum, which is open to all members of the investment team and the operational due diligence team, for validation. The rationale was found to be valid.

The Manager conducts an ESG due diligence assessment of the appointed Investment Manager's proprietary methodology for its allocation of the Sub-Fund. The assessment includes completion of the Manager's proprietary ESG questionnaire at the initial selection process by the appointed Investment Managers which covers:

- ESG policy and governance;
- · ESG integration in investments;
- · Engagement and stewardship; and
- · ESG risk and reporting.

In the reporting year, the ESG score continued to exceed the minimum ESG Score Threshold set by the Investment Manager which is a requirement to be investible.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period (01/10/22-29/09/23), several actions were taken to meet the environmental and/or social characteristics. Aside from application of the exclusions as mentioned above, each of the three Investment Managers undertook the following actions:

ALLIANCE BERNSTEIN Mandate:

The Portfolio promoted E/S Characteristics by holding securities that AB believed promoted E/S Characteristics. A security was be deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration via evidenced ESG research and Engagements. As of 30 September 2023, 88% of the Portfolio met this criteria.
- During the reference period, as applicable, all issuers of securities were compliant with AB's Good Governance Policy.

JACOBS LEVY Mandate:

JL compliance monitoring system monitors the restrictions on a pre- and post-trade basis in relation to the Exclusions applied.

The carbon reduction objective targets a carbon intensity of about 20% lower than that of the benchmark. Jacobs Levy seek to maintain the target through daily optimization of the portfolio, and the percentage is monitored as part of compliance procedures.

For the period since inception of the carbon reduction objective in November 2022 through October 31, 2023, the carbon intensity of the portfolio was lower than the carbon intensity of the benchmark by 20% or more.

JP MORGAN Mandate:

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in companies with positive environmental and/or social characteristics.
- The requirement for all companies in the portfolio to follow good governance practices.

| It made sustainable investments with a social objective:% | with a social objective X It promoted E/S characteristics, but did not make any sustainable investments | | | | | | |

Sustainable investment means an investment in an economic activity that contributes to environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the

investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are

attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period (01/10/22 - 29/09/23), the Sub-Fund pursued an investment strategy that factors in certain environmental and social characteristics in the manner contemplated by Article 8 of the SFDR but does not have as its objective a sustainable investment as such term if understood in accordance with the SFDR. No index has been designated for the Sub-Fund as a reference benchmark for the purposes of the SFDR.

The environmental and social characteristics the Sub-Fund seeks to promote are met by the binding implementation of the exclusions section of the AXA Group Responsible Investment Policy and also by the implementation of the proprietary methodology of each of the Investment Managers. Further information about the latter is presented below.

Environmental characteristics may include, but are not limited to, mitigation of and adaptation to climate change.

Social characteristics may include, but are not limited to, employee welfare and investment that contributes to tackling inequality.

JUPITER AM Mandate:

The environmental and social characteristics promoted by the Fund were: (i) the transition to a low carbon economy in seeking to promote the goal of net zero greenhouse gas emissions by 2050 or sooner. This was done by targeting of issuers achieving net zero greenhouse gas emissions by 2050 or sooner; and (ii) the upholding responsibilities to people and planet in seeking compliance with the UN Global Compact Principles, (the "ESG Characteristics"). This was done through the application of the Exclusions and through the Investment Manager's investment due diligence process.

COMGEST Mandate:

During the reference period, the environmental and/or social characteristics were met by:

implementing the Investment Manager's ("Comgest") Responsible Investment Policy, including its exclusion policy, its ESG integration process as well as its active ownership (engagement and voting) process.

Nikko AM Mandate:

The Investment Manager's focus has been on gender diversity on the boards of investee companies. Engagement was stepped up for companies without female directors, and two companies in the portfolio appointed new female directors in the period from October 2022 to September 2023.

In their voting guidelines, they have stipulated that they will oppose the appointment of top management of companies listed on the TSE Prime Market that do not have any female directors.

As for the percentage of female directors, the percentage of female directors in the portfolio increased from 16.5% at the end of October 2022 to 24.1% at the end of September 2023. In addition, the WACI of the portfolio has been continuously kept within 80% of the benchmark.

How did the sustainability indicators perform?

The Manager undertook an annual assessment of the Investment Manager's rationale for classifying as Article 8 in line with SFDR. The rationale was presented to the Manager's Responsible Investment Forum, which is open to all members of the investment team and the operational due diligence team, for validation. The rationale was found to be valid.

The Manager conducts an ESG due diligence assessment of the appointed Investment Manager's proprietary methodology for its allocation of the Sub-Fund. The assessment includes completion of the Manager's proprietary ESG questionnaire at the initial selection process by the appointed Investment Managers which covers:

- · ESG policy and governance;
- ESG integration in investments;
- Engagement and stewardship; and
- ESG risk and reporting.

In the reporting year, the ESG score continued to exceed the minimum ESG Score Threshold set by the Investment Manager which is a requirement to be investible.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

How did this financial product consider principal adverse impacts on sustainability factors?

Not applicable. This Sub-Fund does not make any sustainable investments, in line with the pre-contractual disclosures.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/10/2022 - 29/09/2023

| Largest Investments | Sector | % Assets | Country |
|------------------------------|---------------------------|----------|---------|
| SUMITOMO MITSUI FINANCIAL GR | Financials | 3.51 | Japan |
| ORIX CORP | Financials | 3.27 | Japan |
| SHIN-ETSU CHEMICAL CO LTD | Materials | 3.14 | Japan |
| TOKIO MARINE HOLDINGS INC | Financials | 3.01 | Japan |
| SONY GROUP CORP | Consumer Discretionary | 2.91 | Japan |
| KDDI CORP | Communication Services | 2.22 | Japan |

| FANUC CORP | Industrials | 1.97 | Japan |
|-------------------------|---------------------------|------|-------|
| RECRUIT HOLDINGS CO LTD | Industrials | 1.95 | Japan |
| SOFTBANK CORP | Communication Services | 1.62 | Japan |
| BRIDGESTONE CORP | Consumer Discretionary | 1.54 | Japan |
| SEKISUI HOUSE LTD | Consumer Discretionary | 1.42 | Japan |
| NEC CORP | Information Technology | 1.36 | Japan |
| DAIKIN INDUSTRIES LTD | Industrials | 1.08 | Japan |
| HAZAMA ANDO CORP | Industrials | 1.06 | Japan |

Please note that the Top Holdings are calculated based on an average of the quarter end holdings and will therefore not align exactly with the holding values contained in the statement of investments.

What was the proportion of sustainability-related investments?

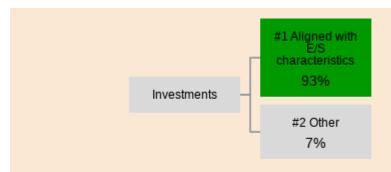

0%

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

Throughout the reference period, the Sub-Fund was invested at least two-thirds of its Net Asset Value in equities domiciled, listed, quoted or traded on Regulated Markets in Japan. Selection Japan Equity may also invest up to 30% in equity-related securities (including preferred stock American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs")) and companies (which may be small, medium or large capitalisation companies) established outside of Japan.

The Sub-Fund planned to allocate at least 80% to investments aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remainings investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environemental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Investments | % |
|------------------------|-------|
| Industrials | 20.7 |
| Consumer Discretionary | 15.87 |
| Financials | 13.96 |
| Information Technology | 13.36 |
| Materials | 10.15 |
| Communication Services | 7.01 |
| Health Care | 7 |

| Consumer Staples | 3.59 |
|------------------|------|
| Real Estate | 3.17 |
| Utilities | 1.21 |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or lowcarbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. Enabling activities directly enable other activities to make a substantial contribution to environmental objective. Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

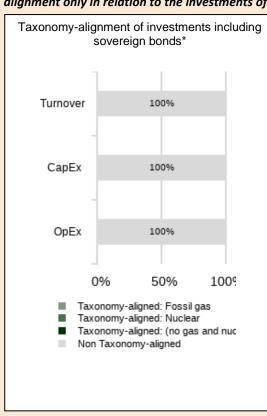

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

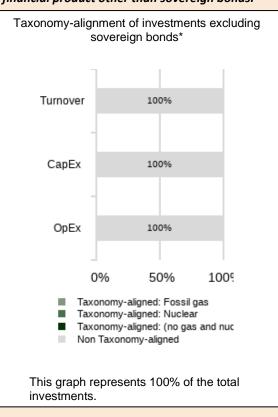

0%

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy ?1

| | Yes | | | | |
|---|-----|----|--------|-----|-------------------|
| | | In | fossil | gas | In nuclear energy |
| Χ | No | | | | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

0%

are sustainable investments with an environmental objective that do not take into account the criteria for environmentall y sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

0%

What was the share of socially sustainable investments?

0%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"Other" included cash, Eligible CIS classified as SFDR Article 6 and derivatives, utilised for investment purposes or efficient portfolio management purposes. Investments categorised as "Other" investments, were not subject to additional minimum ESG safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Several actions were taken to meet the environmental and/or social characteristics during the reference period. Aside from application of the exclusions as mentioned above, each of the two Investment Managers undertook the following actions:

JUPITER AM Mandate:

The investment manager conducted a detailed assessments of underlying investment issuers progress and trajectory along the net zero alignment pathway based on the NZIF guidance. The investment manager utilised the detailed understanding gathered from the assessments to establish engagement priorities linked to the transition to a low carbon economy for each issuer.

The investment manager also conducted an engagement prioritisation assessment at the portfolio level.

Given the systematic nature of the environmental characteristic of the transition to a low carbon economy that is promoted by the fund, the investment manager deemed it necessary to engage more broadly at an industry level to tackle these macro challenges. The investment

manager engaged with investor bodies and industry peers to consider and discuss climate policies targeted at investors.

COMGEST Mandate:

Engagement activities:

Maintaining an active relationship with investee companies is a key element of the Comgest's investment process.

For the one year period to 30 September 2023, 32 engagement activities were carried out with 21 companies in the Sub-Fund to encourage best practices with regard to ESG topics or further exchange ESG information.

56.25% of the engagement activities were related to Environmental topics, 3.13% to Social topics, 6.25% to Governance topics and 34.38% to combined ESG topics.

Voting activities:

Comgest exercises its right to vote at shareholder meetings in accordance with corporate governance values and voting principles that have been determined by Comgest with reference to regulations, industry standards and best practice. Comgest's objective is to vote systematically at all shareholder meetings when it is technically possible to do so.

For the one year period to 30 September 2023, Comgest exercised its voting rights at 100% of shareholders' meeting for companies held by the Fund.

Nikko AM Mandate:

New purchases

Toyota-affiliated trading company Toyota Tsusho (8015 JP), shopping centre operator and credit card company Marui Group (8252 JP), and major electronic components manufacturer Kyocera (6971 JP) are examples of stocks that Nikko AM newly purchased based on their ESG approach.

Engagement to mitigate risk:

Nikko AM also took action to mitigate risk in regard to major shoe store chain ABC-Mart (2670 JP) as well as, after a period of monitoring, the abovementioned major electronic components manufacturer Kyocera (6971 JP).

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

| | How does the reference benchmark differ from a broad market index? |
